DigiGraphics was contracted by Ernestown Windpark Inc. to prepare and mail two (2) notices of public meetings for their renewable energy project.

The mailing was sent to 689 owners and/or residents of lands within 3km of the Project location on July 18, 2012. Loyalist Township staff provided the mailing addresses to Ernestown Windpark from the township's tax assessment roll.

Addresses were verified through software meeting Canada Post parameters and specifications to ensure deliverability.

This report provides a summary receipt of the applicable first class postage, a list of recipients, and copies of Ernestown's notices.

Brent Neely
DigiGraphics
A division of Delta Printing

POSTAGE PREPAYMENT INVOICE

Invoice #: 11392
Invoice Date: July 17, 2012
Client: Horizon

				<u>54.85</u> HST

TOTAL DUE **\$476.77**

DigiGraphics has calculated the amount of postage deposit due as above. This is an approximation based on assumed specifications, and may be subject to change. This amount must be received in advance of your mailing being delivered to the Post Office. A final invoice will be sent upon completion of your mailing.

*Please prepare a cheque or other form of payment, payable to **DigiGraphics***

*Payment is preferred by cash, cheque or debit.
Payments made by credit card will be subject to a handling fee of 1.59% Visa and 1.69% Mastercard.*

NOTICE OF A PROPOSAL AND PUBLIC MEETING

To be held by Ernestown Windpark Inc. as General Partner of Ernestown Windpark LP regarding a Proposal to Engage in a Renewable Energy Project

Project Name: Ernestown Wind Park

Project Location: Loyalist Township, County of Lennox and Addington, Ontario

Dated at Loyalist Township **this the 18th of July, 2012.**

Ernestown Windpark Inc. as General Partner of Ernestown Windpark LP (the applicant) is planning to engage in a renewable energy project in respect of which the issuance of a renewable energy approval is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (ACT) Part V.0.1 and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

Meeting Location:

DATE: Tuesday, September 11th

TIME: 16:00 to 20:00

PLACE: Amherstview Community Hall, 108 Amherst Drive, Amherstview, Ontario

Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Energy Facility. If approved, this facility would have a total maximum name plate capacity of 10MW. The project location is described in the map below.

Documents for Public Inspection:

The Draft Project Description Report describes the project as a five-turbine wind energy facility located on industrial and agricultural lands. The project infrastructure includes, but is not limited to: five (5) Wind Turbine Generators and ancillary infrastructure such as access roads, transformers, collection cables, a meteorological tower, hydroelectric lines and a transformer substation. A written copy of the Draft Project Description Report will be made available for public inspection on Wednesday, July 18th, 2012 at:

1. Amherstview Library, 322 Amherst Drive, Amherstview
2. Lennox & Addington County Library, 102 Main St, Bath
3. Lennox & Addington County Library, Odessa Branch
4. Loyalist Township Main Office, 263 Main Street, Odessa
5. Kingston-Frontenac Public Library, Turner Branch, 935 Gardiner's Rd, Kingston

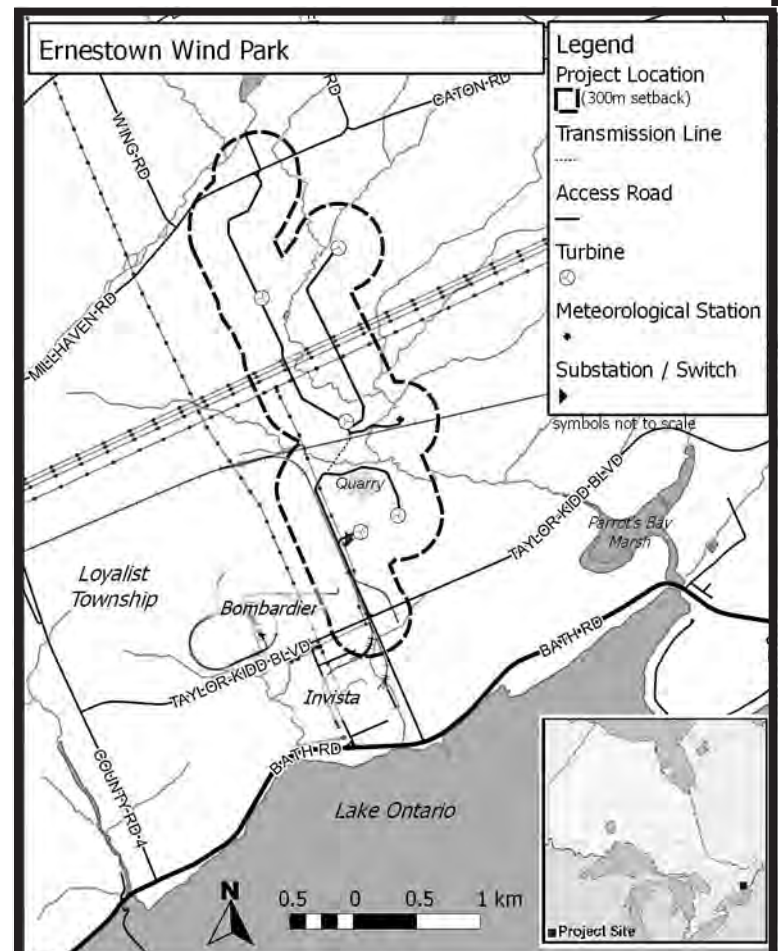

Further, the applicant has obtained or prepared, as the case may be, supporting documents in order to comply with the requirements of the Act and Regulation. Written copies of the draft supporting documents will be made available for public inspection on Wednesday, July 19th, 2012 at the locations listed above and online on the project website.

Project Contacts and Information:

July 2011: Draft Project Description Report ⓘ

This report gives a preliminary review of the proposal for agency and stakeholder consideration. More information will become available as we complete more studies. A DRAFT Renewable Energy Approval Report with project plans and details will be made available once studies and assessments are complete.

06/14/2010

→ Download → View → Details

Draft Water Body Report ⓘ

The objective of the Water Body Report is to investigate and report on the understanding of the water features in the project location and the in the regional water system. The investigation includes a records review and a site investigation, followed by an impact assessment and mitigation proposal.

07/18/2012

The findings of the Report were that the water bodies that flow through the project location are part of the Parrot's Bay Conservation Area. The watershed, in our project location, includes intermittent streams and permanent streams that support wetland areas in a small area of valleyland. The impact assessment found that the water crossings proposed pose little impact on the water bodies and that overall impact to the flora and fauna is minimal.

[Draft Water Body Report](#)

The objective of the Water Body Report is to investigate and report on the understanding of the water features in the project location and the in the regional water system. The investigation includes a records review and a site investigation, followed by an impact assessment and mitigation proposal. 07/18/2012

The findings of the Report were that the water bodies that flow through the project location are part of the Parrot's Bay Conservation Area. The watershed, in our project location, includes intermittent streams and permanent streams that support wetland areas in a small area of valleyland. The impact assessment found that the water crossings proposed pose little impact on the water bodies and that overall impact to the flora and fauna is minimal.

[Draft Visual Impact Assessment](#)

The Visual Impact Study (VIS) shows the wind farm's appearance after construction, from various familiar vantage points in the area. The VIS was created digitally using Computer Aided Design software to model the turbines and render them in realistic lighting and vantage point conditions. These renderings are digitally combined with panoramic photographs from around the Loyalist Township to give a realistic view of the Project when completed. The VIS was conducted using eight vantage points. 07/18/2012

[Draft Turbine Specifications Report](#)

The Wind Turbine Specifications Report is a technical document that identifies and lists the features of the turbines selected for the Project, which includes: 07/18/2012

The make, model, name plate capacity, hub height above grade and rotational speeds;

The acoustic emissions data for the turbine.

[Download](#) [View](#) [Details](#)

[Draft Transportation Plan Report](#)

This plan outlines the transportation requirements and presents a preliminary analysis of transportation routes. It is anticipated and described in the plan that turbine components will be transported along Highway 401 (Hwy 401) and through Loyalist Township to the site. 07/18/2012

The report examined route safety, road construction, bridges, overhead utilities, intersection geometries, community disruption, seasonal weather, and traffic volumes. The Roads & Bridges division for the County of Lennox & Addington was consulted regarding local road restrictions and permitting requirements.

[Draft Site Plan Report](#)

The Draft Site Plan Report presents the layout of the infrastructure planned for the Ernestown 07/18/2012

The Draft Site Plan Report presents the layout of the infrastructure planned for the Ernestown Wind Park. The purpose of the report is to identify the locations of the turbines and indicate the valid sound receptors which were identified as present the day before the report was released. 07/23/2012

[Download](#) [View](#) [Details](#)

[Draft Project Description Report](#)

The project description report highlights the specifications of the project in the context of all the studies and identifies the project infrastructure in the Site Plan Map. 07/18/2012

[Download](#) [View](#) [Details](#)

[Draft Noise Impact Assessment Report](#)

The Noise Impact Assessment (NIA) is conducted to assess the projected noise created by the project components from the closest noise receptors, such as homes, schools and places of worship. The NIA calculated the distance from each of the wind turbines that the sound level equals the accepted noise for a receptor, as defined by the Ministry of the Environment as 40 decibels. The study found that no candidate receptors were located within the 40dB region, and the individual calculations for each home in the area confirmed these findings. 07/18/2012

[Download](#) [View](#) [Details](#)

[Draft Natural Heritage Assessment Report](#)

The Natural Heritage Assessment (NHA) is a detailed investigation undertaken to understand the natural features of the project location (and surrounding ecosystems) and the impacts of the proposed development on these areas, while proposing mitigation for any negative impacts identified. 07/18/2012

The results of the NHA indicate that there are some significant natural features on the project site, but that the Project poses few impacts to these features. In addition, the Proponent will undertake reasonable care in executing the mitigation measures to minimize the impacts to vegetation and wildlife

[Draft Design and Operations Plan Report](#)

The Design and Operations Report is an account of: 07/18/2012

Maps and diagrams of all proposed project infrastructure;

A list of any noise receptors that may be negatively affected by the use or operation of the facility;

Environmental effects monitoring plan;

A response plan setting out a description of the actions to be taken while engaging in the project to inform stakeholders.

[Download](#) [View](#) [Details](#)

[Draft Decommissioning Plan Report](#)

The Decommissioning Report outlines the process by which the operational Project is planned to be closed, disassembled and the site returned to pre-development conditions. The Decommissioning Plan report has been prepared in accordance to these requirements and Chapter 7 of the Technical Guide to Renewable Energy Approvals (MOE, 2011). 07/18/2012

[Draft Cultural Heritage Assessment Report](#)

07/18/2012

A Cultural Heritage Assessment is composed of two parts: a Heritage Assessment which looks at built structures and other features of cultural or heritage significance such as heritage buildings and an Archaeological Assessment which looks for features of archaeological significance within the study area.

[Download](#) [View](#) [Details](#)

[Draft Construction Plan Report](#)

07/18/2012

The Construction Plan Report outlines the construction and installation activities that are planned to take place in order to commission the Project. The report covers the location and timing of any construction or installation activities for the duration of the construction and installation. The report also discusses any negative environmental effects and mitigation measures in respect of these effects that may result from construction and installation activities.

[Draft Archaeological Assessment Report](#)

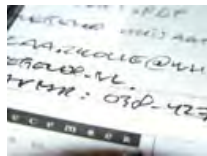

07/18/2012

AMICK Consultants Limited undertook a Stage 1 archaeological assessment of the subject property, including a property inspection, the property was identified as holding archaeological potential. The report recommends that that the proposed undertaking be preceded by a Stage 2 archaeological assessment.

Following the above recommendation AMICK undertook Stage 2 physical assessments of the property in areas where the ground may be disturbed during project construction and operation. Based on the physical assessments of the property, no archaeological resources were encountered. It was recommended that no further archaeological assessment of the property is required.
