Re: Ernestown Windpark – Request for list of aboriginal communities

Dear Ms. Santos:

In accordance with Ontario Regulation 359/09, s. 14, I am writing to provide you a copy of the Draft Project Description Report for the Ernestown Windpark, and to request from the Director a list of aboriginal communities who, in the opinion of the Director,

- 1) have or may have constitutionally protected aboriginal or treaty rights that may be adversely impacted by the project, or
- 2) otherwise may be interested in any negative environmental effects of the project

Background

- The development is known as the Ernestown Windpark in Loyalist Township, Ontario being proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP.
- The nameplate capacity of this facility is expected to be 10MW in size.
- A FIT contract has been signed with the Ontario Power Authority, the Commercial Operation Date for this project is in November of 2011
- A Notice of a Proposal to Engage in a Renewable Energy Project and Public Meeting was first issued on May 29th, 2010.
- The first public open house was held on June 29th, 2010.
- Our project website www.ernestownwind.com has information and copies of the Draft Project Description Report, notices, and other information.

You have also been added to our mailing list, and will be kept informed as the project progresses. Please do not hesitate to contact me if you have any questions or concerns.

Yours very truly,

Nhung Nguyen

Ms. Nhung Nguyen
Ernestown Windpark Inc.
2300 Yonge Street, Suite 801
P.O Box 2300
Toronto ON M4P 1E4

Dear Ms. Nguyen:

RE: Director's Aboriginal Communities List - Ernestown Wind Park

The Ontario Ministry of the Environment (Ministry) has reviewed the information provided in the *Draft of the Project Description Report (PDR)* received for the *Ernestown Wind Park*. The Ministry has reviewed the anticipated environmental effects of the project (as described in the PDR) relative to its current understanding of the interests of aboriginal communities in the area.

In accordance with section 14 of Ontario Regulation 359/09 "Renewable Energy Approvals under Part V.0.1 of the Act" (O. Reg. 359/09) made under the *Environmental Protection Act*, please find below the list of aboriginal communities who, in the opinion of the Director:

i) have or may have constitutionally protected aboriginal or treaty rights that may be adversely impacted by the project (s.14(b)(i)):

Aboriginal Community
Common Name:
Reserve Name:

NOTE: None of the foregoing should be taken to imply approval of this project or the contents of the PDR. This letter only addresses the requirement of the Director to provide a list of aboriginal communities to you as required pursuant to section 14 of O. Reg. 359/09. You should also be aware that information upon which the above list of aboriginal communities is based is subject to change. Aboriginal communities can make assertions at any time, and other developments, for example the discovery of Aboriginal archaeological resources, can occur that may require additional aboriginal communities to be notified. Should this happen, the Ministry will contact you. Similarly, if you receive any feedback from any aboriginal communities not included in this list, as part of your consultation, the Ministry would appreciate being notified.

Please contact Narren Santos at (416) 314-8442 should you have any questions or require additional information.

Sincerely,

Doris Dumais

SENT VIA REGISTERED MAIL

December 13th, 2010

Chief James Marsden - Alderville First Nation
Mississaugas of Alderville
PO BOX 46
Rosenewath, ON.
K0K 2X0

Boozhoo,

By way of a friendly greeting, we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in an Aboriginal consultation process for this project. As such, we respectfully request an opportunity to come before Chief and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Aboriginal consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

Att: Jean-Francois Daoust

Re: Ernestown Windpark

Dear Jean-Francois Daoust,

Thank you for your consultation request to Alderville First Nation regarding the **Ernestown Windpark which will be located in Loyalist Township and the City of Kingston**, which is being proposed within our Traditional and Treaty Territory. We appreciate the fact that **Ernestown Windpark Inc.** recognizes the importance of First Nations Consultation and that your office is conforming to the requirements within the Duty to Consult Process.

As per the Alderville First Nation Consultation Protocol, your proposed project is deemed a level 3, having minimal potential to impact our First Nations' rights, therefore, please keep Alderville apprised of any archaeological findings, burial sites or any environmental impacts, should any occur.

Although we may not always have representation at all stakeholders meetings, it is our wish to be kept apprised throughout all phases of this project. I can be reached at the contact information below.

In good faith and respect,

Dave Simpson

Dear Chief Marsden: Please find attached a draft project description of the proposed Ernestown Wind Park, a project of Toronto based Horizon Legacy. This will serve as the background for our meeting on Monday at 15h00. I look forward to meeting you and your colleagues. I will be joined by Ms. Nhung (pronounced Yuen) Nguyen, Project Manager, Renewable Energy Development & Management for Horizon Legacy. Kind regards, John Kim

Minutes

Of a meeting between Nhung Nguyen, Project Manager, Ernestown Wind Park and John Kim Bell, Aboriginal Affairs Advisor

-And-

Chief James R. Marsden, Councillors Dave Mowat, Pam Crowe, Randall Smoke, Wes Marsden Jr., Band Administrator Angela Gillies, Dave Simpson Lands and Resources Communication Officer and Administrative Assistant Melanie Boyd-Warren

The meeting was held on January 9, 2012 at the Alderville First Nation administration office.

The purpose of the meeting was to commence a consultation with HFN on EWP's proposed Ernestown Wind Park.

Chief Marsden informed Mr. Bell and Ms. Nguyen of the community's proposed 5 MW solar project and suggested he may call upon Mr. Bell to assist the community to ask the Federal Department of Aboriginal Affairs and Northern Development convert that land to the desired zoning designation required to construct the solar project in a more timely manner.

Ms. Nguyen outlined the scale of the proposed Ernestown Wind Park including the 800 acre footprint and the requirement by Ontario that 25% of the turbine parts must be manufactured in Ontario.

The Chief and Council outlined that the community moved from its prior site (near the proposed Ernestown Wind Park's site) in 1837 and that they have an active land claim.

Mr. Bell sought clarity on the border of Alderville's land claim and traditional territory for the purpose of establishing whether or not Alderville could assert that the EWP's proposed wind park impacted them, which would fortify a position that the community is entitled to an accommodation.

When asked directly if the Chief and Council thought the proposed site of the wind park impacted them, they responded in the affirmative and clarified that they were seeking a benefit.

Mr. Bell posed questions to clarify whether or not there was evidence to support the Chief and Council's contention that the proposed wind park was within their recognized and proven traditional territory.

Councillor Dave Mowat stated that these boundaries were recognized in a pre-confederation treaty, but he did not cite the specific treaty. Later on, he clarified that the land claim did not include the parcel of land where the proposed wind park will be located.

Chief Marsden clarified that HFN formerly occupied lands in the Bay of Quinte but that the Mohawks of the Bay of Quinte (Tyendinaga) would likely dispute the land claim.

Mr. Bell offered that this issue would be explored and that EWP would return to discuss a benefit (should it be substantiated that the community's territory includes the site of the proposed wind park)

There being no further business, the meeting was adjourned.

ERNESTOWN

Wind Park Inc.

Introduction

Alderville First Nation

January 9, 2012

www.ernestownwind.com

Presentation Outline

- Developer Overview
- Project Overview
- REA Process
- Consultation and Feedback
- Progress to date

Developer Overview

- **Ernestown Windpark Inc** – created in 2010 to develop and operate a 10 MW wind project
- **A Family Business** – the company is owned by the Zwig family, which is 90% focused on Renewable energy
 - Over 50 years of successful infrastructure and real estate development
 - Wind project developments in Ontario, Quebec, Maritimes
 - Proven, experienced team of professionals able to deliver successful wind projects

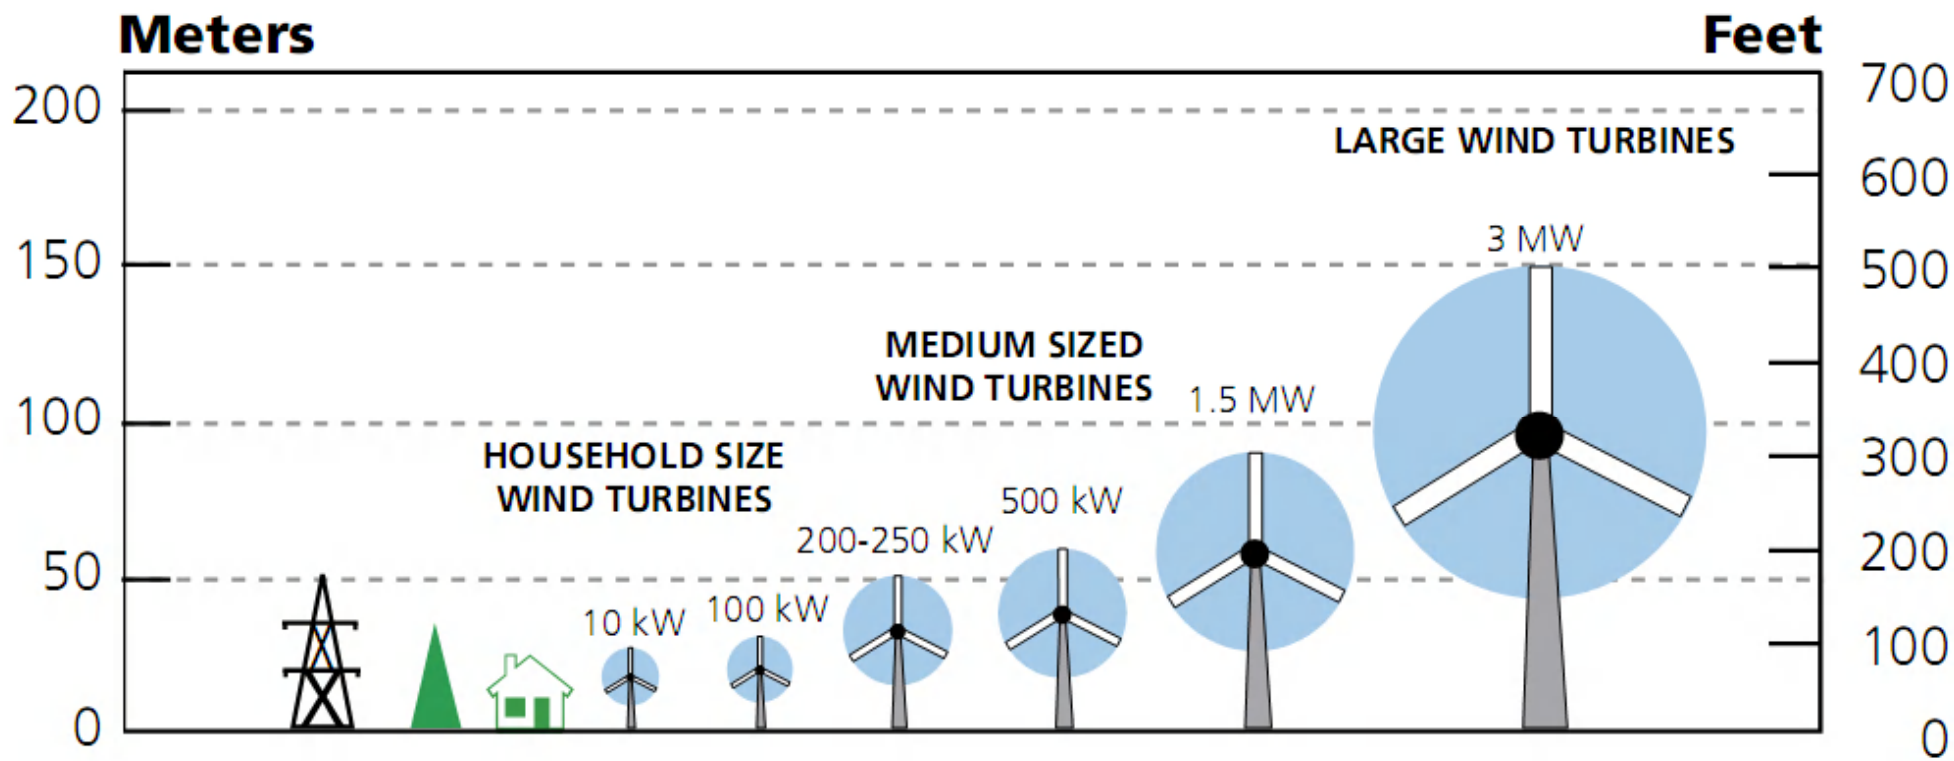

Developer Overview

- **Experience** – We are currently developing 88.5 MW of renewable energy projects in North America
- **Interest** – We develop, finance, construct, own and operate renewable energy facilities
- **Social Values** – We believe in **Small** renewable energy projects developed with **Transparent** communication and **Proactive** consultation in **Respect** with community interests

Operating Projects

Wind Projects in Operation

- 4.5 MW Minnesota (USA) 2009
- 6 MW Nova Scotia 2010
- 1.5MW Nova Scotia 2011
(shared with community)

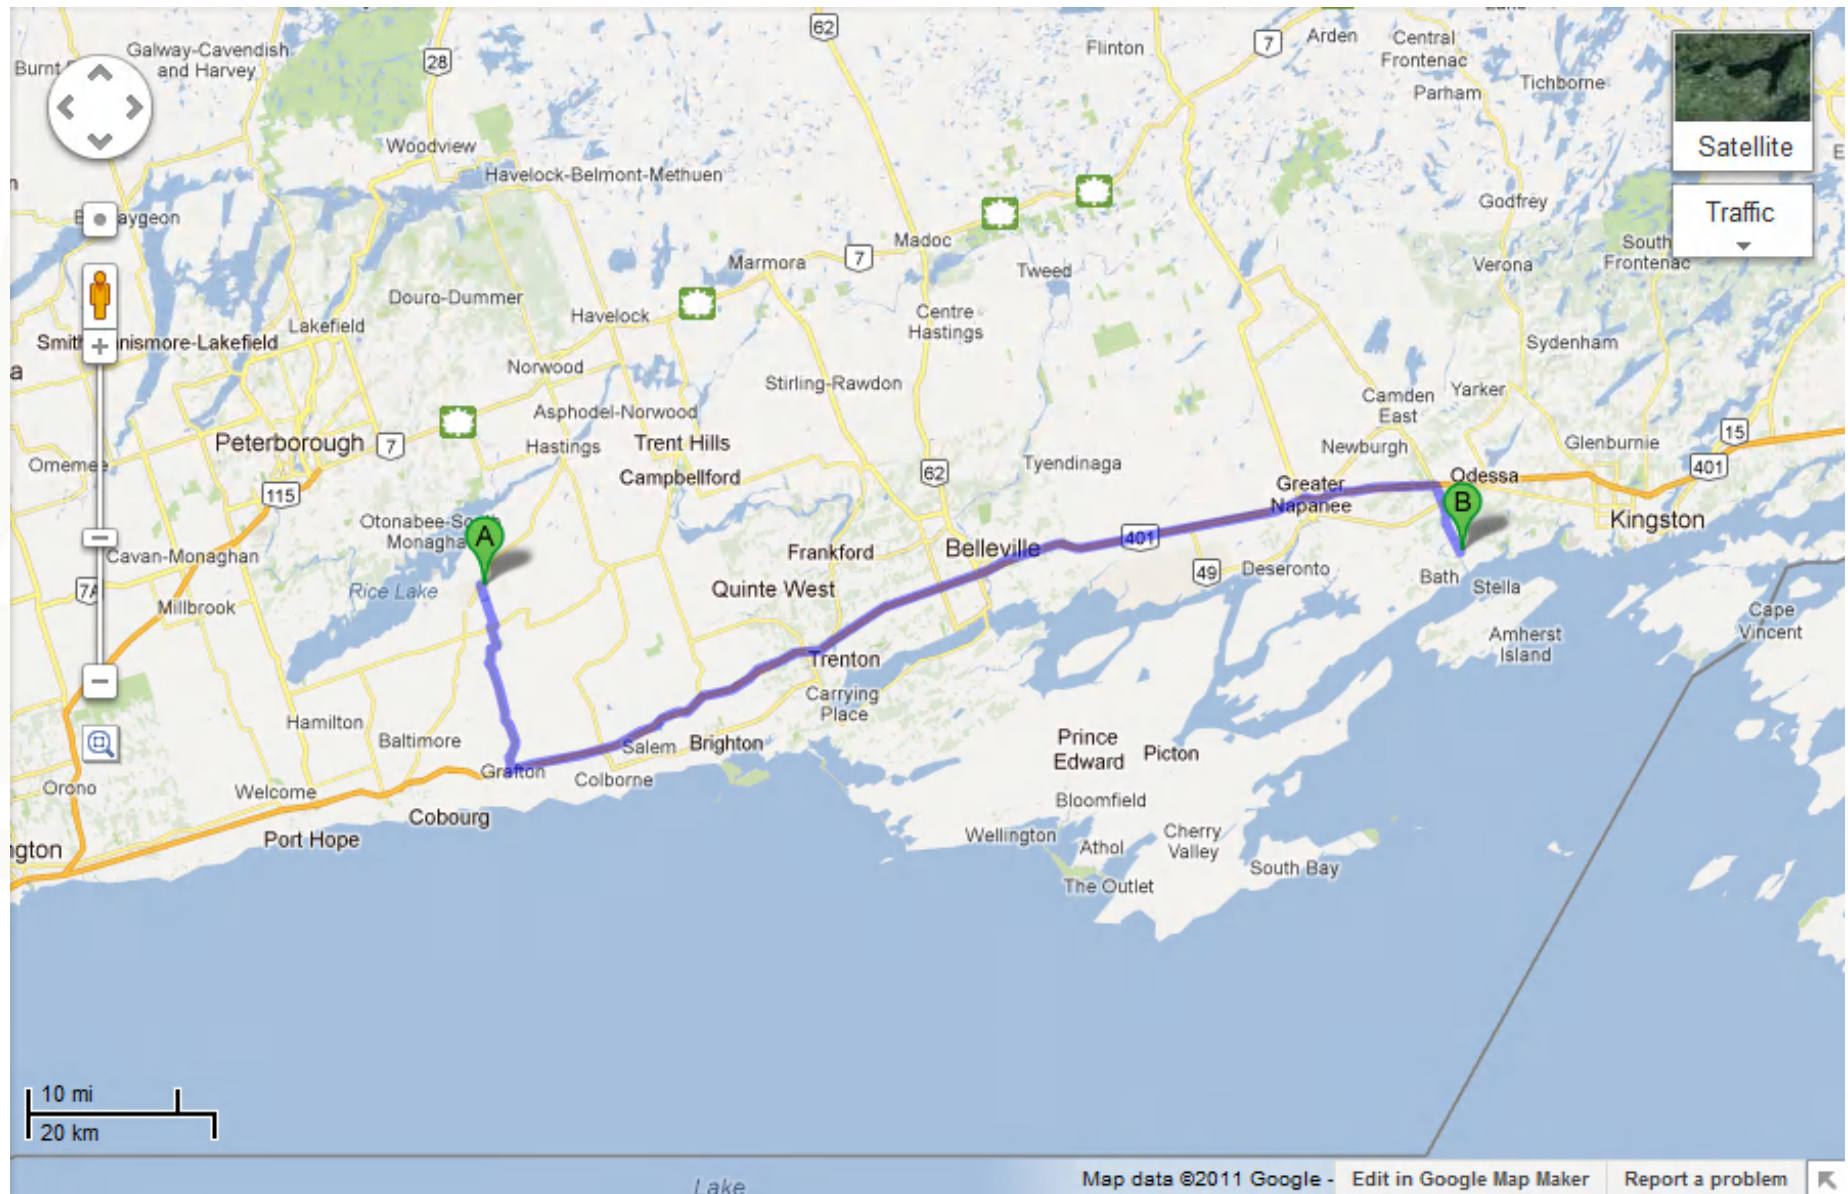

Project Overview

- **Context** – the project is participating under Ontario's Feed-in Tariff (FIT) program and currently holds a FIT contract
- **Capacity** – maximum nameplate capacity of 10 MW, between 4-6 turbines
- **Location** – the project is located on private lands adjacent to Taylor Kidd Industrial Park

Project Location

136km, 1h 57m drive from Alderville office (Google)

Project Location

Renewable Energy Approval Process

Process – The project will follow the permitting and approvals requirements in *O.Reg 359/09* and MNR's *Approval and Permitting Requirements Document for Renewable Energy Projects*

- **Information**; public meetings and information sessions in the community
- **Consultation**; with the various Ministries, Government organizations and stakeholders
- **Authorization**; permitting process with the municipal, provincial and federal authorities

Initial Consultations

Correspondence to Alderville

- Dec 13, 2010: Sent Letters, Project Description, Notice of proposal
- Jan 26, 2011: Received response from Dave Simpson

Public Meetings

- Loyalist Township. June 29th 2010, 6:00-8:00 pm.
Amherstview Community Hall
- City of Kingston. June 30th 2010, 6:00-8:00 pm.
Invista Center, Hall D

Early Feedback

Feedback

- Public meetings
- Door to door
- Over 200 impressions
- Education and Outreach
- Going above and beyond regulations

Progress

Renewable Energy Approval

- Natural and biological studies - complete
- Aeronautical studies – complete
- Archaeology and cultural heritage – complete
- Turbine selection – in process

Additional work

- Detailed transportation study
- Emergency procedures and safety protection plan
- Construction plan
- Site plan

Hi Dave!

It was a real pleasure for me to meet you in person. Thank you for welcoming us into your community. Both John and I felt that it was a good meeting to start our relationship and we look forward to working with in the future.

John will send you a copy of our meeting minutes in the next day or two. I attach a copy of the presentation I made yesterday and a copy of the original letter we received in 2011.

Thanks again,
Nhung

Chief and Council
Alderville First Nation
Mississaugas of Alderville
P.O. Box 46, 11696 2nd Line Rd
Alderville, ON K0K 2X0

Dear Chief Marsden and Council,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. The project is located approximately 108km east relative to Alderville First Nation community. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

Draft Project Description Report
Draft Construction Plan Report
Draft Decommissioning Plan Report
Draft Design and Operations Report
Draft Noise Impact Assessment Report
Draft Turbine Specifications Report

Draft Transportation Plan Report
Draft Visual Impact Study
Draft Cultural Heritage Assessment
Draft Archaeological Heritage Assessment
Draft Natural Heritage Assessment
Draft Water Body Report

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that

Ernestown Windpark Inc. as general partner of Ernestown Windpark LP

2300 Yonge Street Suite 801, PO Box 2300, Toronto, Ontario, Canada M4P 1E4
phone: (416) 864-9977 fax: (416) 864-9568 web: www.ernestownwind.com

you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

Nhung Nguyen
VP Development

Ernestown Windpark Inc.,

Minutes & Consultation Notes

Of a consultation meeting on September 10, 2012 between Alderville First Nation as represented by:

Dave Mowat, Councillor
Wes Marsden, Councillor
Dave Simpson, Consultation Officer, Lands and Resources
Pam Crowe Councillor
Melanie Boyd, Administrative Assistant &
Angela Gillies, Band Administrator &

-And-

Nhung Nguyen, VP, Development and John Kim Bell, Senior Advisor, Aboriginal Affairs, representing Ernestown Windpark Inc.

This consultation represented the second consultation meeting between the parties.

Nhung Nguyen presented the 10 MW Ernestown Project and described the history and ownership of the company.

10 MW will provide energy to 3000 homes. The site in Loyalist Township (Odessa) is adjacent to the Taylor Kidd Industrial Park and was chosen because this is already an industrially zoned area.

The turbines are placed onto class two agricultural lands, which are considered to be inferior farm land. It was noted that Sun Edison, a solar developer, is proposing a solar project adjacent to the Ernestown Wind Park.

Dave Simpson asked about the footprint being on agricultural land. Nhung responded and identified the footprint as being 800 acres owned by two farmers.

Nhung outlined the project footprint and information related to site information, the community engagement program, and identified and listed community supporters.

Information was provided on the E92 Enercon turbines to be used with a capacity of producing 2 MW to 2.3 MW. The turbines are approximately 100 metres tall. The infrastructure requirements are limited to turbines, the road, and power lines (transmission-44 Kilovolt voltage).

Nhung presented the Stage One Archeology Report including records review plus field reconnaissance conducted by Amick. She outlined that in addition, a cultural heritage study was conducted as well.

At the conclusion of the project, John Kim Bell reiterated the key aspects of the project as follows:

- It is a small project with a small footprint
- The environmental footprint of the project is negligible
- There is significant local support for the project
- Minimal trees will be cut and an arborist will be retained to design a tree planting plan

The discussion then focussed on the partnership between Alderville and Gilead Power who is mounting a wind project. Councillor Dave Mowat described the Gilead Project as a more sensitive project for birds. (The project has 8 or 9 turbines) Gilead Power is in negotiations with Alderville with Gilead offering Alderville an economic benefit.

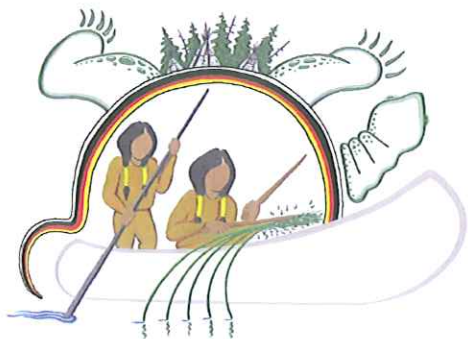

The discussion then focussed on Alderville's assertion that the site of the Ernestown Wind Park is on Alderville traditional lands and consequently Alderville is asserting an interest in the project. Councillor Dave Mowat identified that Alderville was part of the 1783 and 1784 the Crawford Purchase, and the 1788 purchase known as the Gunshot Treaty (that had no land description). Alderville was also part of the 1856 treaty regarding lands under the Islands Treaty of Upper St. Lawrence, Lake Ontario, the Bay of Quinte, and Wellers Bay.

Dave Mowat outlined that the Mohawks of the Bay of Quinte located on their current site in 1794. Alderville was a signatory to the 1923 treaty known as The Williams Treaty (which has two parts to it) and outlined that all Williams Treaty signatories are challenging the financial terms, the language, and boundary of the treaty in a court challenge.

John Kim Bell outlined that the Ernestown Wind Park was located on a site clearly outside of the Williams Treaty boundary. He further outlined that any previous treaty was extinguished by the Williams Treaty and that prior treaties were likely peace and friendship treaties that conveyed no rights. Based upon his research, John Kim opined that Alderville did not have much of a threshold to assert any real rights. However, the developer, Horizon would like to work in a friendly manner with Alderville and to find a way to find an path between the parties.

Alderville outlined that it was a co-developer in a 10 MW solar farm with developer, Johnson Controls is the community's Engineering Procurement and Construction and Management. Bank of Montreal was providing the financing to the project.

The parties agreed to continue the dialogue in good faith. There being no further business, the meeting was adjourned.

RE: Ernestown Wind Park Project

This letter is written in regards to the Ernestown Wind Park Project.

Alderville First Nation (AFN) would like to confirm that in accordance with the Renewable Energy Act process, two (2) meetings have been held to discuss the Ernestown Wind Park Project with their respective representatives, the latest being September 10, 2012. Alderville First Nation does not consider these meetings to be consultation.

Alderville First Nation has no objections to this project located in our traditional territory and discussions with Ernestown Wind Park will be ongoing to address our concerns.

Yours sincerely,

A handwritten signature in purple ink that reads "Chief James R. Marsden". The signature is written in a cursive, flowing style.

GENERAL DELIVERY
Curve Lake, ON., K0L 1R0

Boozhoo,

By way of a friendly greeting, we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in an Aboriginal consultation process for this project. As such, we respectfully request an opportunity to come before Chief and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Aboriginal consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

Dear Jean-Francois,

RECEIVED JAN 07 2011

Re: Ernestown Windpark

We would like to acknowledge receipt of your correspondence dated December 13, 2010 regarding the above noted project.

As you may be aware, the area in which your project is proposed is situated within the Traditional Territory of Curve Lake First Nation. Our First Nation's Territory is incorporated within the Williams Treaty Territory and is the subject of a claim under Canada's Specific Claims Policy. We strongly suggest that you provide Karry Sandy-Mackenzie, Williams Treaty First Nation Claims Coordinator with a copy of your proposal as your obligation to consult to also extend to the other First Nations of the Williams Treaty.

Although we have not conducted exhaustive research nor have we the resources to do so, Curve Lake First Nation Council is not currently aware of any issues that would cause concern with respect to our Traditional, Aboriginal and Treaty rights.

Please note that we have particular concern for the remains of our ancestors. Should excavation unearth bones, remains or other such evidence of a native burial site or any Archaeological findings, we must be notified without delay. In the case of a burial site, Council reminds you of your obligations under the *Cemeteries Act* to notify the nearest First Nation Government or other community of Aboriginal people which is willing to act as a representative and whose members have a close cultural affinity to the interred person. As I am sure you are aware, the regulations further state that the representative is needed before the remains and associated artifacts can be removed. Should such a find occur, we request that you contact our First Nation immediately.

If any new, undisclosed or unforeseen issues should arise, that has potential for anticipated negative environmental impacts or anticipated impacts on our Treaty and Aboriginal rights we require that we be notified regarding these as well.

At this time, Chief and Council do not feel there is a need for a meeting with you, if we have any further questions, we shall forward them to yourself at the above address.

Thank you for recognizing the importance of consultation and respecting your duty to consult obligations as determined by the Supreme Court of Canada.

Should you have further questions, please feel free to contact me.

Yours sincerely,

Chief Keith Knott

JOHN KIM BELL
PRESIDENT
Bell and Bernard Limited

John Kim Bell is one of the most decorated Aboriginal people in Canada. Mr. Bell was born on the Kahnawake Mohawk Reserve on the south shore of Montreal. He began playing the piano on television at the age of 10 and conducting on Broadway in New York at the age of 18 for stars like Gene Kelly, Vincent Price, Sonny Bono, and Lauren Bacall.

PRIOR HISTORY

He toured as a conductor for the Bee Gees and Redd Foxx, among others, and was appointed Apprentice Conductor of the Toronto Symphony in 1980 making him the first person of Aboriginal heritage to become a symphonic conductor.

He has conducted many orchestras in Canada, some in the U.S. and the Royal Philharmonic in the U.K. He has composed music for film and television including PBS's *The Trial of Standing Bear* and CTV's *Divided Loyalties*, which at the time was the most expensive made for television movie in Canada.

He is the Founder of the Canadian Native Arts Foundation, National Aboriginal Achievement Foundation and the National Aboriginal Achievement Awards. Over a period of twenty years, John Kim Bell built the Foundation into Canada's largest Aboriginal charity and developed the highest level of private sector support for any Aboriginal cause in Canada.

He has produced many concerts across Canada featuring movie and Broadway stars such as Bernadette Peters, Manhattan Transfer, and produced and co-composed the first full scale Aboriginal dance production, *In The Land of Spirits*, which premiered in the National Arts Centre in 1988. "Spirits" enjoyed a national tour across Canada in 1992 with Mrs. Mila Mulroney serving as the Honorary Chair of the tour.

He also staged *Beyond Survival*, an international indigenous cultural conference where he arranged delegates attending from the Soviet Union, Lapland, Ecuador, Guatemala, Colombia, Japan, Mexico and the U.S.

He is attributed with discovering Shania Twain and was recently featured in the CBC movie on her life. He has received the Orders of Canada and Ontario and was the sole recipient of the Royal Bank Award for Canadian Achievement in 1998, major Canadian award, which carried a cash prize of \$250,000. He was named the national recipient of the outstanding national cultural leader by The Canadian Conference of the Arts in 2003. He received a Lifetime Achievement Award from the Royal Conservatory of Music in 2007. He holds six Honorary Doctorates.

AWARDS & RECOGNITION

In 2005, he served as one of five Canadian advisors to The Prince of Wales.

In July 2007, Mr. Bell opened, on behalf of the Siksika First Nation, the \$33 million dollar Blackfoot Crossing Historical Park in Siksika, Alberta, Canada's largest First Nation owned and operated tourist attraction. Bell & Bernard Limited oversaw all aspects of the Park and, together with the operators, worked hard to make it a world class tourist attraction.

CURRENT POSITION

Mr. Bell is currently taking an active role in the development of energy projects involving First Nations. He served as an Intervenor, on behalf of the former National Chief, Phil Fontaine in the Integrated Power System Plan (IPSP) review process.

Mr. Bell's proposal to Ontario to establish a loan guarantee program for First Nations was successful with Ontario announcing a \$250 million loan guarantee program in March 2009.

Mr. Bell is currently Senior Advisor, Aboriginal Affairs to Brookfield Renewable Power. He is President of Bell & Bernard Limited, a management consulting firm specializing in First Nations economic development and energy. He recently established the Enbridge School Plus Program and awards \$1 million to First Nations schools in Western Canada.

Mr. Bell has served on the boards of the Canadian Broadcasting Corporation, Donna Cona Incorporated, the Millennium Scholarship Foundation and is currently serving as a director of the Ontario Chamber of Commerce, Canadian Council on Social Development, Kwagis Power, Waas Power, and Chiiwedjin Shu Energy. He is a Founder of Eeyou Power Management Limited, a Cree owned energy company in James Bay, Québec.

He recently returned to conducting and appeared at Toronto's Harbourfront to headline an international indigenous festival in August 2009. The concert will be broadcast on APTN on May 29, 2010.

He is the subject of three documentaries on his life. A fourth documentary on his life and accomplishments is currently in production and will be aired in the Spring of 2011.

Subject: [Bulk] Meeting with Curve Lake First Nation

Good morning Mr. Bell,

Krista and I had scheduled a meeting with you on January 12, 2012 in regards to the Ernestown Wind Park that is being proposed by Horizon Legacy, for whom you are a consultant with Bell and Bernard. There was a concern about your interest in meeting with our community as there are many other First Nations closer to this projects location and with who may have traditional and treaty rights. After discussions with both Curve Lake First Nation's Chief and General Manager, they are in the agreement that Curve Lake First Nation is not interested in meeting on this project as the Ernestown Wind Park is outside of our treaty territory. Unless Bell and Bernard can identify an underlying issue that would directly impact Curve Lake First Nation, we do not wish to comment on the Ernestown Wind Park or make any statements that may have an impression on any other First Nations which may be directly affected by this development. Although we do not have an interest in this particular wind park, Curve Lake First Nation has a continued interest in any ventures that may affect our treaty and Aboriginal rights and therefore need to be notified on any future proposed undertakings.

Thank you for your time,

Melissa Dokis

Dear Chief Knott and Council,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. The project is located approximately 135km east relative to the Curve Lake First Nation community. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

Draft Project Description Report
Draft Construction Plan Report
Draft Decommissioning Plan Report
Draft Design and Operations Report
Draft Noise Impact Assessment Report
Draft Turbine Specifications Report

Draft Transportation Plan Report
Draft Visual Impact Study
Draft Cultural Heritage Assessment
Draft Archaeological Heritage Assessment
Draft Natural Heritage Assessment
Draft Water Body Report

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

Ernestown Windpark Inc. as general partner of Ernestown Windpark LP

phone: (416) 864-9977 fax: (416) 864-9568 web: www.ernestownwind.com

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

Dear Nhung Nguyen,

RE: Ernestown Wind Park Documents Forthcoming for your Review

We would like to acknowledge receipt of your correspondence, which we received on 6/21/2012 regarding the above noted project.

As you may be aware, the area in which your project is proposed is situated within the Traditional Territory of Curve Lake First Nation. Our First Nation's Territory is incorporated within the Williams Treaty Territory and is the subject of a claim under Canada's Specific Claims Policy. We strongly suggest that you provide Karry Sandy-Mackenzie, Williams Treaty First Nation Claims Coordinator, 8 Creswick Court, Barrie, ON L4M 2S7, with a copy of your proposal as your obligation to consult to also extend to the other First Nations of the Williams Treaty.

Although we have not conducted exhaustive research nor have we the resources to do so, Curve Lake First Nation Council is not currently aware of any issues that would cause concern with respect to our Traditional, Aboriginal and Treaty rights.

Please note that we have particular concern for the remains of our ancestors. Should excavation unearth bones, remains or other such evidence of a native burial site or any Archaeological findings, we must be notified without delay. In the case of a burial site, Council reminds you of your obligations under the *Cemeteries Act* to notify the nearest First Nation Government or other community of Aboriginal people which is willing to act as a representative and whose members have a close cultural affinity to the interred person. As I am sure you are aware, the regulations further state that the representative is needed before the remains and associated artefacts can be removed. Should such a find occur, we request that you contact our First Nation immediately. Curve Lake First Nation also has available, trained Archaeological Liaisons who are able to actively participate in the archaeological assessment process as a member of a field crew, the cost of which will be borne by the proponent.

If any new, undisclosed or unforeseen issues should arise, that has potential for anticipated negative environmental impacts or anticipated impacts on our Treaty and Aboriginal rights we require that we be notified regarding these as well.

Thank you for recognizing the importance of consultation and respecting your duty to consult obligations as determined by the Supreme Court of Canada.

Should you have further questions or if you wish to hire a liaison for a project, please feel free to contact Melissa Dokis or Krista Coppaway at 705-657-8045x222 or dutytoconsult@curvelakefn.ca.

Yours sincerely,

Chief Phyllis Williams
Curve Lake First Nation

Interim Chief Councillor Greg Cowie - Hiawatha First Nation
Mississaugas of Rice Lake
Hiawatha First Nation 36, RR2
Keene, ON., K0L 2G0

Boozhoo,

By way of a friendly greeting, we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in an Aboriginal consultation process for this project. As such, we respectfully request an opportunity to come before Chief and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Aboriginal consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

February 28th, 2011

Dear Interim Chief Councillor Greg Cowie,

we are writing you to follow up with the letter sent on December 13th 2010 and the e-mail sent on January 21st 2011, including (4); an introduction letter, the Ernestown Newsletter issued, the Ernestown Draft project description report published and the Notice of a Proposal & Public meeting. Your opinion regarding this project is important to us.

In order to receive your comments and discuss the project, we are inviting you to a meeting to introduce the Ernestown Wind Park project.

Please just let us know if you are interested and we will schedule a meeting at your convenience.

Meanwhile, should you have any question, feel free to contact me.

Yours very truly,

--

Dear Chief Moore: It was a pleasure to speak with you yesterday. Please find attached a draft project description of the proposed Ernestown Wind Park, a project of Toronto based Horizon Legacy. This will serve as the background for our meeting tomorrow. I look forward to meeting you and your colleagues. I will be joined by Ms. Nhung (pronounced Yuen) Nguyen, Project Manager, Renewable Energy Development & Management for Horizon Legacy. Kind regards, John Kim

Minutes

Of a meeting between Nhung Nguyen, Project Manager, Ernestown Wind Park and John Kim Bell, Aboriginal Affairs Advisor, representing Horizon Legacy

-And-

Duane Cowie, Councillor, Diane Sheridan, Consultation Officer of and Land Resources Manager and Sharon L. Wilshaw, Economic Development Officer representing Hiawatha First Nation

The meeting was held on January 5, 2012 at the Hiawatha First Nation administration office.

The purpose of the meeting was to commence a consultation with HFN on HL's proposed Ernestown Wind Park.

Chief Sandra Moore was ill and therefore unable to join the meeting. Mr. Cowie, Ms. Sheridan and Ms. Wilshaw represented the Chief's and community's interest at the meeting.

Councillor Cowie provided an overview of the membership. HFN has a band membership of approximately 400 members with 165 members living on reserve and 231 members living off reserve.

Ms. Nguyen provided an overview of Horizon Legacy outlining HL's 88.5 MW of installed capacity with three existing wind projects with two in North American located in Minnesota, and Nova Scotia.

Ms. Nguyen conveyed the details of the proposed Ernestown Wind Park as an approximate 10 MW project consisting of 4 to 6 turbines on a site of approximately 800 acres on industrially zoned land. The footprint of the turbines is on a site of approximately 20 acres and the overall site is located near the Collins Bay Correctional Facility.

The HFN delegation received Ms. Nguyen and Mr. Bell positively and the discussion was cordial. Ms. Sheridan asked about issues related to soil disruption and was satisfied with Ms. Nguyen response that soil disruption would be minimal.

The only issue noted was that it was HFN's preference to be consulted on the phase one archeological study and should a phase two study take place, HFN would like to assist in the design of the phase two studies with an on-site monitor appointed by the Chief and Council.

Ms. Sheridan posed a question regarding the nature and depth of environmental monitoring that will take place and Ms. Nguyen cited that the site is required to be monitored for a period of 3 to 5 years post construction.

In terms of asserting an impact on HFN, it was cited that HFN's traditional territory is defined by the Williams Treaty and that the boundary did not extend to the proposed site of the Ernestown Wind Park. Consequently, no assertion is being made by HFN that there is an impact on HFN and therefore no benefit is being sought by HFN.

Ms. Wilshaw cited that the traditional border of HFN extended to the edge of what is now Belleville.

The group expressed an interest in knowing if there were employment opportunities related to the proposed wind park. Ms. Nguyen agreed to provide information to the community on this issue. It was noted that St. Lawrence College has a program to train individuals in wind turbine maintenance.

The parties agreed that there would be another presentation to the community on the next stage of development of the proposed wind park.

HFN has a total of four Councillors and the next community election will take place in January of 2013.

There being no further business, the meeting was adjourned.

Dear Chief Sandra Moore and Hiawatha Council,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. The project is located approximately 120km east relative to the Hiawatha First Nation community. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

Draft Project Description Report
Draft Construction Plan Report
Draft Decommissioning Plan Report
Draft Design and Operations Report
Draft Noise Impact Assessment Report
Draft Turbine Specifications Report

Draft Transportation Plan Report
Draft Visual Impact Study
Draft Cultural Heritage Assessment
Draft Archaeological Heritage Assessment
Draft Natural Heritage Assessment
Draft Water Body Report

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

Ernestown Windpark Inc. as general partner of Ernestown Windpark LP

phone: (416) 864-9977 fax: (416) 864-9568 web: www.ernestownwind.com

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

Nhung Nguyen

Dear Mr. John Kim Bell:

Thank you for the information you shared with Hiawatha First Nation regarding the "Ernestown Wind Park" which is being proposed close to Hiawatha First Nations' Traditional and Treaty Territories. Hiawatha First Nation appreciates the fact that Horizon Legacy recognizes the importance of First Nations Consultation and that your office is conforming to the requirements within the Duty to Consult Process however this correspondence is not considered meaningful consultation but rather information sharing.

As per the Hiawatha First Nation Consultation Protocol, your proposed project is deemed, having minimal potential to impact Hiawatha First Nations' rights at this time, however, please keep us apprised of any updates, archaeological findings, and/or of any environmental impacts, should any occur. We reserve the right to comment later, if something further along in the process is deemed to be a potential impact.

We would like to be contacted if artifacts are found and to be sent any archaeological reports as they are completed.

We can be contacted at the mailing address above or electronically via email, at the email address below.

In good faith and respect,

Hello,

I am not taking meetings on these issues as we have no funding to do so.

Our concerns are infringements upon our hunting and fishing Rights, and if there are any issues of archaeology to be dealt with.

Unless these issues are present, we are not wishing to be involved at this time.

September, 2012-09-11

Dear John Kim Bell,

After a careful review of the binder of information for the Ernestown Wind Park Project Revised 2012-05-25, I find that there are no areas of concern for our Community, Kawartha Nishnawbe First Nation of Burleigh Falls.

One of our major concerns is in the area of Archaeology, and that has been covered in the report by Amick Consultants Ltd. I would also like to mention that if any archaeological issues arise during construction, that we like to be notified at that time.

I would comment that the amount of work done to make sure all areas of concern were met is thorough, and I have found nothing that would offer issues for our community, and no further contact, unless something arises in the future for this project, are necessary.

Therefore at this time, I feel that all concerns for our Community have been met, and we wish you great success with this project.

(Note; Our approval of this project in no way diminishes our Treaty Rights in this area of our Territory.)

Meegwich, and thank you for allowing our community to consult in is project.

Regards,

Chief Kris Nahrgang,
Kawartha Nishnawbe First Nation

SENT VIA REGISTERED MAIL

Chief Tracey Gauthier
Mississaugas of Scugog Island First Nation
22521 ISLAND ROAD
Port Perry, ON., L9L 1B6

Boozhoo,

By way of a friendly greeting, we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in an Aboriginal consultation process for this project. As such, we respectfully request an opportunity to come before Chief and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Aboriginal consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

Dear Chief Tracey Gauthier,

we are writing you to follow up with the letter sent on December 13th 2010, including (4); an introduction letter, the Ernestown Newsletter issued, the Ernestown Draft project description report published and the Notice of a Proposal & Public meeting. Your opinion regarding this project is important to us.

In order to receive your comments and discuss the project, we are inviting you to a meeting to introduce the Ernestown Wind Park project.
Please just let us know if you are interested and we will schedule a meeting at your convenience.

Meanwhile, should you have any question, feel free to contact me.

Yours very truly,

Minutes

Of a meeting between Nhung Nguyen, Project Manager, Ernestown Wind Park and John Kim Bell, Aboriginal Affairs Advisor, representing Ernestown Windpark Inc

-And-

Mr. Murray Maracle, Community Consultation Specialist, Ms. Monica Sanford, Community Consultation Administrative Assistant and Ms. Rhonda Coppaway, Lands Manager all representing Scugog First Nation (SFN).

The meeting was held on January 26, 2012 at the Scugog First Nation administration office.

The purpose of the meeting was to commence a consultation with SFN on HL's proposed Ernestown Wind Park.

Ms. Nguyen outlined the project as a 10 MW project consisting of five turbines. She noted that Ontario energy policy requires 25% of all turbines used in a project to be manufactured in Ontario.

Ms. Nguyen outlined the history of Ernestown as a commercial real estate developer owned and operated by a family and owning and operating approximately 6 million square feet of commercial space in Toronto.

Ms. Nguyen outlined that Ontario was in the process of replacing coal and manufacturing and Ontario's energy policy to focus on renewable energy would assist Ontario in providing clean energy while stimulating the economy.

Ms. Nguyen outlined that Ernestown was a long term owner and operator of energy assets and did not intend to flip any assets. She outlined that Ernestown had a successful wind project in Nova Scotia and Minnesota and that both projects were under five turbines. She outlined that Ernestown had a partnership with 20 municipalities in Quebec on a 100 MW project plus a solar project on a student campus.

Mr. Maracle asked more about the turbines. Ms. Nguyen explained that they used larger turbines that were more efficient in that they spun more slowly but captured more wind volume. The blades were of an approximate size of 50 metres in length.

Ms. Coppaway asked about maintenance and repair issues in context to the use of the road to be used. Ms. Nguyen outlined the proposed maintenance regime.

Mr. Maracle pointed out that the lands on the southern side of the utility road were used for a mix of agriculture and an active quarry. He further pointed out the CN Rail also operates on the site and the site also houses a transmission line. Ms. Nguyen underscored that the industrial use of the land made this site perfect for a wind farm.

Mr. Maracle asked the proximity of the quarry to the wind turbines and Ms. Nguyen responded that it should be at least 30 metres for safety reasons. Mr. Maracle then questioned whether or not dust from the aggregate at the quarry would increase as a result of the turbine use.

Ms. Nguyen explained that the site is located five kilometres from Lake Ontario. With respect to the dust and turbine issue, she outlined that the turbine hub may be 100 metres and 150 metres in height overall.

The turbines must adhere to Ontario regulation 359-09. She explained that the Ministry of Environment studies issues including noise and where and how the turbines are oriented. She noted that there would be lights on the turbines as a precaution for airplanes flying nearby. However, no federal approvals were required for this project.

Ms. Nguyen identified that Ernestown's first outreach to Scugog First Nation was in December of 2010. She agreed to forward all existing reports and that public reports would be issued in May or June of 2012.

Mr. Maracle outlined that Scugog had a band membership of 215 members with 45 on reserve. Only approximately 12 were under the age of 18. He outlined that SFN was included in the Williams Treaty and also part of pre-confederation treaties and Upper Canada Treaties.

Ms. Nguyen outlined that the Phase Two Archeological Study had been completed by Amick, a consulting group specializing in archeological studies.

It was noted that Algonquin Power was developing a 70MW project nearby. Mr. Maracle observed that the township had designated this particular land for wind and/or solar development.

Ernestown's schedule for construction has been delayed from Spring 2012 to January 2013.

Mr. Maracle asked how long Scugog had to comment on the Round One Information presented and Ms. Nguyen responded that 60 days was the normal period of time for responding to any issues.

Mr. Maracle asked about the facilities required on site during construction. Ms. Nguyen outlined that Ernestown would have temporary storage facilities including trailers for the construction workers, which would be also used for storage of tools and equipment.

The consultation ended at this point and there being no further business or questions, the meeting was terminated.

Minutes Prepared by John Kim Bell

June 21st, 2012

Mississaugas of Scugog Island First Nation
22521 Island Road
Port Perry, Ontario, L9L 1B6

Dear Chief Tracey Gauthier and Council,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. The project is located approximately 175km east relative to the Mississaugas of Scugog Island First Nation community. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

Draft Project Description Report

Draft Construction Plan Report

Draft Decommissioning Plan Report

Draft Design and Operations Report

Draft Noise Impact Assessment Report

Draft Turbine Specifications Report

Draft Transportation Plan Report

Draft Visual Impact Study

Draft Cultural Heritage Assessment

Draft Archaeological Heritage Assessment

Draft Natural Heritage Assessment

Draft Water Body Report

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above. We invite you to make this information available to your members. You will have 60 days in which to

review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Dear Mr. Bell,

RE: Ernestown Wind Park – First Nation Consultation

I am writing to first thank you for your efforts in engaging the First Nation and sharing information about the proposed Ernestown Wind Park. The information presented at our meeting here at the First Nation this past January and through the draft Renewable Energy Approvals Reports received in July is much appreciated. I can confirm at this time that the Mississaugas of Scugog Island First Nation have no concerns or further comments regarding the Ernestown Wind Park as it has been presented to us to date.

I would ask that the First Nation please be notified immediately should any significant changes be made to the proposed project or if any archaeological resources are uncovered during construction.

Should you have any questions or wish to discuss anything further please contact me at 905-985-3337, ext 263 or email: mmaracle@scugogfirstnation.com.

Kindest regards,

Murray Maracle
Community Consultation Specialist

Good Afternoon...

First, I would like to apologize for the lateness of this email, and information given to you. Understanding, that we do have limited staff, and we have issues pop up all the time, unplanned.

Your meeting request WILL be place on the March 7th council agenda. There was a meeting on February 15th, but due to my time constraints I was unable to prepare the needed data to make the deadline. The next council meeting is not until March 7th... in the meantime (before March 1st) can you please provide me with dates near the end of March, early April as to when you would be available to meet with Chief and Council, their calendars fill up quick, so multiple dates and times would be great.

Thanks,

Kristin Maracle.

Good Morning Kristin: I am contacting you to secure a meeting with the Chief and Council as soon as possible to present Horizon Legacy's proposed Ernestown Wind Park. I have been trying to secure this meeting since November starting with Charlie Maracle. I spoke with Bonnie Thompson last Friday who indicated you would email a date last Friday. So, I am now contacting you to secure that date. I would be most grateful to have this nailed down. I can be reached at 647.293.8614 and thanks. John Kim

Dear Chief Maracle and Council,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. The project is located approximately 30km east relative This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

Draft Project Description Report

Draft Construction Plan Report

Draft Decommissioning Plan Report

Draft Design and Operations Report

Draft Noise Impact Assessment Report

Draft Turbine Specifications Report

Draft Transportation Plan Report

Draft Visual Impact Study

Draft Cultural Heritage Assessment

Draft Archaeological Heritage Assessment

Draft Natural Heritage Assessment

Draft Water Body Report

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

phone: (416) 864-9977 fax: (416) 864-9568 web: www.ernestownwind.com

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices. In April 2012, through our representative John Kim Bell, Ernestown proposed a consultation plan, considering the community's consultation process, and provided this plan to Ms. Kristin Maracle. We would like to meet with you to discuss the plan and obtain your input on whether it is consistent with your expectations.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

CORRESPONDENCE LOG

Participants: Jean Francois Daust (Ernestown representative) John Kim Bell (Ernestown representative)	Type of Correspondence: <input checked="" type="checkbox"/> Phone <input checked="" type="checkbox"/> Email <input type="checkbox"/> Meeting <input checked="" type="checkbox"/> Letter/Mail <input type="checkbox"/> Notice
Date, time, location:	Recorded by: NN
Project: Ernestown Wind Park	
DESCRIPTION	
<p>December 13, 2010 – JFD sends an introductory letter and consultation package to Chief Don Maracle. The letter requests engagement in consultation, offers to hold an open house in the community the last week of Jan 2011 to conduct consultation with the community, and requests a written response regarding any adverse aboriginal impacts to the project. No response was received.</p> <p>February 29, 2011 – JFD sends a follow up email. No response was received.</p> <p>Jan 17, 2012 – JKB attempts to set up a meeting with the Mohawk Bay of Quinte (MBQ) to discuss the project. The consultation officer indicates she is trying to identify a date in the first week of February for the first visit.</p> <p>Feb 17, 2012 - JKB speaks with Bonnie Thompson, Assistant to Chief Don Maracle at the MBQ. Bonnie indicates that Ernestown will likely be on the agenda scheduled for the second week in March. This is the fiscal year-end of all Aboriginal organizations and they are currently constructing their budget for the coming year. The Chief is aware of our request and has suggested the second week in March.</p> <p>On or about April 11, 2012 – JKB forwards a proposed consultation plan to the MBQ. Invites input.</p> <p>May 16, 2012 – JKB speaks with Dan Brant, the future Chief Administrative Officer for MBQ. JKB explains that it has been difficult to engage. Dan confirmed he will arrange a presentation with the Chief and Council once he assumes his new position on June 4.</p>	
NEXT ACTION	
JKB to follow up with Dan Brant regarding a presentation before Council on June 4.	

MOHAWKS OF THE BAY OF QUINTE

RECEIVED SEP 10 2012

September 4, 2012

Mr. John Kim Bell
Senior Advisor, Aboriginal Affairs
Horizon Legacy
2300 Yonge Street, Suite 800
Toronto, ON
M4P 1E4

Dear John Kim;

I would like to advise you that the Council of the Mohawks of the Bay of Quinte (MBQ) have reviewed the Draft Consultation agreement dated July 31, 2012 and have agreed to enter into a consultation protocol with Horizon Legacy regarding its proposed Ernestown Wind Park project.

As per the process outlined in the agreement, MBQ will begin the consultation process with Horizon in good faith. We are also in receipt of the proposed term sheet and while there is considerable interest, I am sure you know, the execution of the equity participation will be dependent upon the results of a successful consultation process.

We look forward to working with you and reaching a mutually beneficial conclusion as an outcome of the consultation process.

Nia:wen

Daniel J Brant
CAO

Minutes

Of a consultation meeting between held on September 10, 2012 in the band council office of Tyendinaga also known as the Mohawks of the Bay of Quinte represented by:

Daniel J. Brant, Band Manager
Lisa Maracle, Director of Community Services
Kristin Maracle, Environmental Officer
Tanya (Shoo-Shoo) King-Maracle, Policy Officer
Renee Barnhart, Economic Development Officer &
Bev Hill, Communications Officer

Hereinafter referred to as the consultation committee

-And-

Ernestown Wind Park Inc., the owners and operators of the proposed Ernestown Windpark LP represented by:

Nhung Nguyen, Vice-President, Development and John Kim Bell, Senior Advisor, Aboriginal Affairs, for Ernestown Wind Park Inc.

Dan Brant, CEO and band manager, welcomed John Kim and Nhung and provided the history of the relationship. John Kim and Nhung had met with Chief and Council on June 24, 2012. Subsequently, the Chief and Council passed a motion to approve the consultation plan submitted by Ernestown Wind Park Inc. for a community consultation.

Dan outlined that there will be two different processes, a consultation process on the impacts of the project and a second process dealing with the possibility of the community acquiring an equity position as a partner in the project.

Nhung Nguyen noted that she submitted a binder to the community with all of the approvals. Nhung presented the 10 MW project and described the history and ownership of Ernestown Windpark Inc.

This proposed wind park will generate approximately 10 MW of energy, which will provide energy to 3000 homes. The site in Loyalist Township (Odessa) adjacent to the Taylor Kidd Industrial Park was selected because this it was already zoned as an industrial area.

The project will consist of 5 turbines, which constitutes a small project.

One of the landowners nearby is Cruickshank Constructions who own and operate a quarry close to the site. CN railroad crosses the site as this is one of their key corridors.

A question was raised by the consultation committee regarding the distance between turbines. Nhung responded that the distance between each turbine is approximately 300- 500 metres.

Dan Brant asked about the difference in characterization between lands that were called woodlands vs. significant woodlands. Nhung responded that significant woodlands were more environmentally sensitive and therefore protected to a greater degree.

Nhung outlined that the required power line was being constructed, owned and operated by Hydro One. Dan Brant queried the total land area required by the wind park. Nhung responded that the total footprint of the project was approximately 800 square acres.

The turbines to be used were identified as German made Enercon E92, yielding 2 to 2.3 MW of power. Nhung also commented that the physical footprint of the turbines was approximately 100 metres high and the blades were 40 to 60 metres in length.

John Kim noted that there was no impact on any water resources, the ground and little impact on trees. Nhung underscored that Ernestown was using an existing farmer's road and proposing to build its road on top of the farmer's road. Doing this would not only save money (to build on the existing road) but would prevent any trees from being cut down. Nhung outlined that a few trees will be cut down in an area of an acre but that an arborist will be retained for a tree replanting program.

Nhung presented the visual impact study, community engagement effort, and identified a number of local organizations who were in support of the Ernestown Wind Park.

The consultation committee asked whether any bird studies had been undertaken and whether the project affects any migratory bird paths. Nhung responded that many studies were undertaken including butterfly, migration, amphibian, fish, field birds, species at risk, flora and fauna studies. There was a special study on the bobolink (bird), a species at risk. Nhung concluded that the project is not in a migratory bird path and that the studies undertaken exceeded the actual requirements because federal protocols were also followed and adhered to.

Nhung outlined the Archeology Stage One Study for the site, which included records review, photographic surveys and test pit surveys every five metres. Plus a high intensity pedestrian survey at 5 metre intervals. These studies were undertaken by Amick. The consultation committee asked if anything of significance was found and Nhung responded that nothing of interest was found and that there were no cultural heritage resources found.

The consultation committee asked about the depth of the turbines in the ground required to erect the turbines. Nhung responded that the turbine bases would be 3 to 4 metres deep.

The consultation committee asked if the company was leasing the land from local farmers. Nhung responded that the site was indeed being leased from the farmers.

The consultation committee asked when the wind park would be commissioned and Nhung responded by the end of 2013.

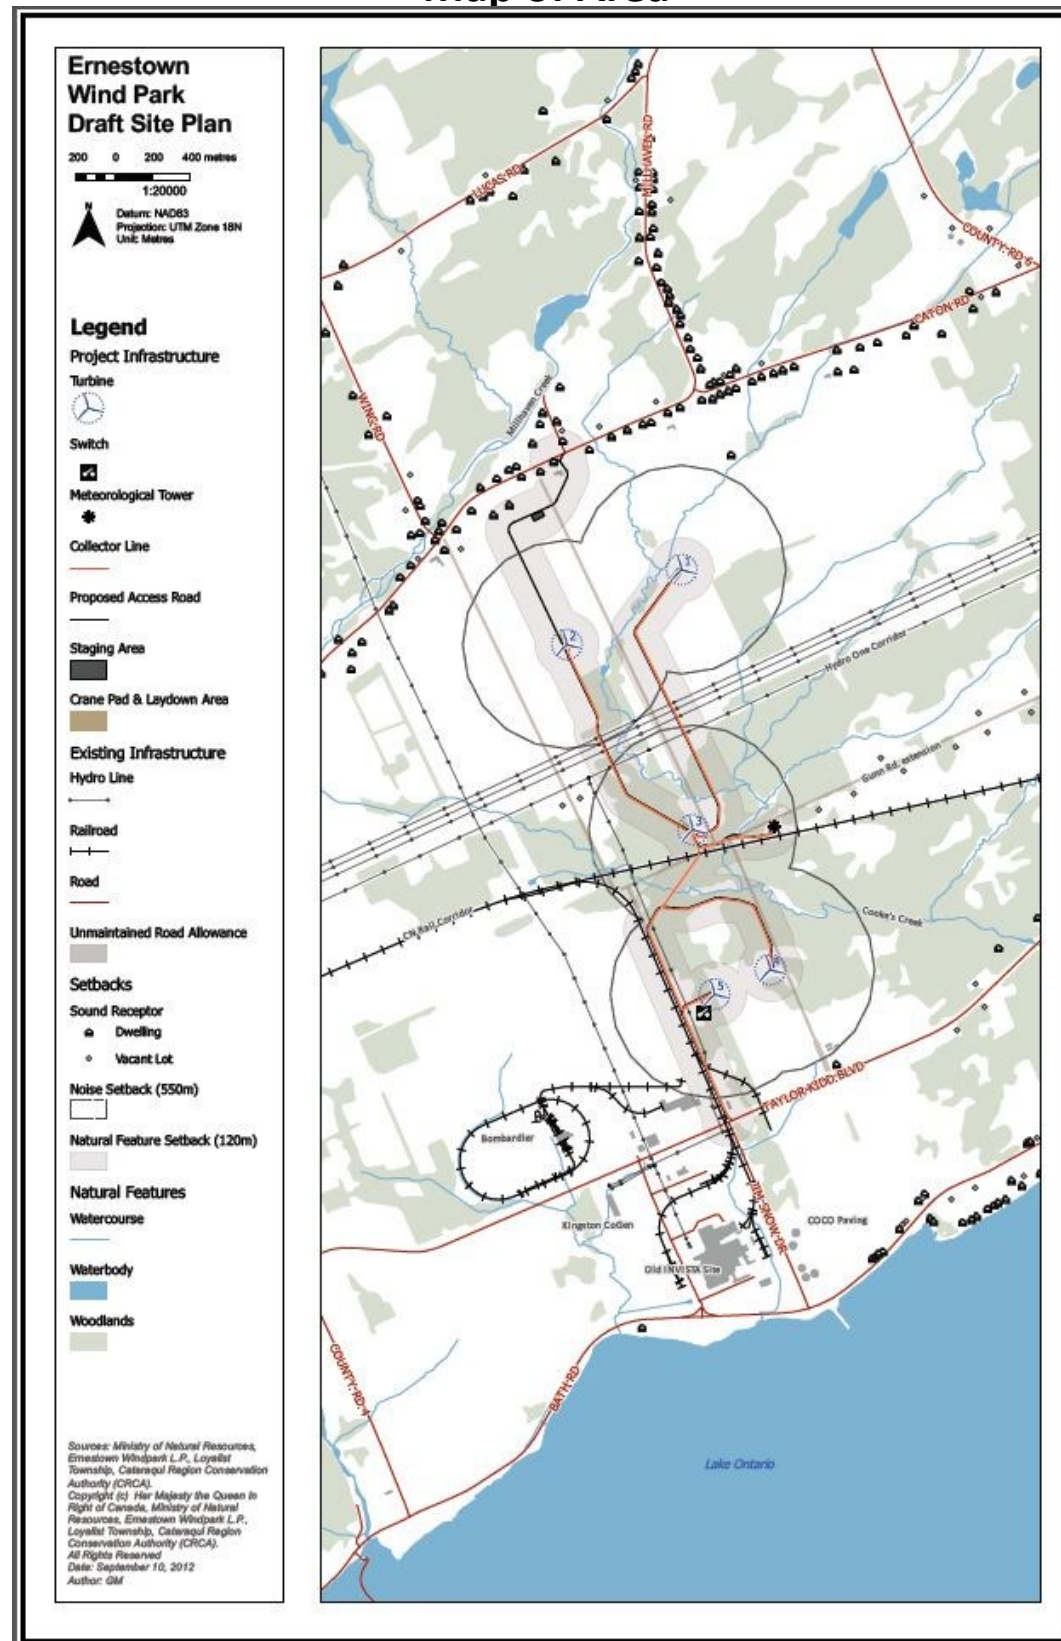

Dan questioned about another wind project being proposed nearby as well as the Amherst Island Projects planned for the same area. Dan asked if there was any relationship with Ernestown. Nhung responded that there was no relationship between the parties and that the Ernestown Wind Park was the only wind project supported by Loyalist Township.

The consultation committee asked if the company had published any reports on any public meetings held. Nhung responded that a consultation report would be concluded and posted by the end of September 2012.

There being no further questions from the consultation committee, the consultation meeting concluded at 11h20.

The consultation committee will invite the company to present the project to community members commencing with the local fall fair scheduled for September 21 and 22.

Map of Area

Ernestown Wind Park

The Ernestown Wind Park project is being conducted under the Ontario Power Authority's FIT program (Feed-in Tariff) which encourages the development of renewable energy projects in Ontario. In April of 2010, this specific project was awarded an energy supply contract for a minimum period of 20 years and since then has been conducting studies and impact assessments prior to the installation phase of the Wind Turbines. The proposed area for the Wind Park is near an industrial area on Taylor Kidd Boulevard between County Roads 4 and 6, just south of Odessa, Ontario, and will include 5 wind turbines. (see diagram on back page)

The Ernestown Wind Park Project team, as part of their commitment to consultation with affected groups, organizations and individuals, has contacted the Mohawks of the Bay of Quinte in order to field questions and concerns related to the proposed Wind Park and ensure to that all stakeholder points have been addressed prior to implementation.

Their initial meeting with the Tyendinaga Mohawk Council (TMC) in June of 2012 was to bring information regarding the proposed Wind Park to their attention and to address

any immediate concerns of the Tyendinaga Mohawk Council. At that time, the TMC agreed to take part in a consultation process and was presented with a draft consultation package that included all of the various reports on the impacts of a Wind park.

There will be an Open House held at the Kanhiote Library on Tuesday September 18th from 11 a.m. until 2 p.m. and 6 p.m. until 8 p.m. at which time MBQ representatives will have the reports for your review, and accept questions/concerns to be answered at a community meeting. The Ernestown Wind Park Project Team will be available at the Mohawk Agricultural Fair to field questions as well as to provide additional information, on Saturday September 22nd, and will attend a community meeting on Thursday September 27th, at 7:00 p.m. at the Mohawk Community Centre.

Nhung Nguyen, Project Manager
Tel. : 416-864-9977 x8288
nhung@ernestownwind.com

Website: www.ernestownwind.com

The following is a summary of information for your review and consideration.

Developer:

Horizon Legacy Group, a family owned business that has over 60 years of experience, has renewable energy assets in Canada and abroad and an excellent track record. It is focused on small to medium sized renewable energy projects. Ernestown Windpark Inc. was established by Horizon Legacy Group with a mission to develop, own and operate a small, low impact wind energy facility in Loyalist Township.

Ernestown Windpark Inc. will handle the development, construction and operation of the Wind Park and is a general partner of Ernestown Windpark LP, which is based in Toronto, ON.

A Clean and Renewable Energy Source:

As a resource, wind energy is completely renewable, highly reliable and very efficient.

Using wind to produce enough power for over 200 homes (2,000,000 kWh) of electricity instead of burning coal will leave 900,000 kilograms of coal in the ground and reduce annual greenhouse gas emissions by 2,000 tonnes. This has the same positive impact as taking 417 cars off the road or planting 10,000 trees.

Sources: CanWEA The development and construction of Ernestown Wind Park is subject to regulations administered by the Ministry of the Environment to minimize or mitigate impacts on the environment.

Renewable energy projects in Ontario are subject to Ontario Regulation 359/09, under the Environmental Protection Act, also known as the Renewable Energy Approval process

Environmental Regulations:

The development and construction of Ernestown Windpark is subject to regulations administered by the Ministry of the Environment to minimize or mitigate impacts on the environment. Renewable Energy projects in Ontario are subject to Ontario Regulation 359/09, under the Environmental Protection Act, also known as the Renewable Energy Approval process.

Turbine Specifications:

Project Capacity: 10 megawatts

Wind turbine model: Enercon E92

Number of turbines: 5

Hub height: 98m

Blade length: 44 m

Annual number of homes powered: about 3500

The distribution of wind turbines has been designed to allow for maximum power generation, while taking into account the constraints of the manufacturer (minimum distance required between wind turbines), the regulations (Ontario Regulation 359/09 for the installation of wind turbines), agreements with owners of lots, environmental constraints, suggestions and comments from citizens.

When the wind turbine blades are moving, they activate the drive shaft that transmits the wind’s kinetic energy to the turbine, which in turn produces electricity.

The electricity is then sent to a processor located inside the turbine. The transformer changes the voltage and current frequency for the electricity to be transmitted over the network of aerial or underground collector power lines. These power lines carry electricity to a transformer station, also known as the substation. The substation can increase the electricity voltage to be conveyed to the transmission or distribution lines on the local network managed by Hydro One. And from there, electricity is distributed to consumers.

A Positive Impact on the Local Economy

Wind Park is committed to buying materials, turbine components, and services from businesses based in Ontario. Preference will be given to local contractors, labour, suppliers, materials and turbine components. Ernestown Windpark is actively seeking to have at least 95% of the project’s content from Ontario.

During the development, construction and operational phases, Ernestown Wind Park will invest approximately \$30 million in the project area and the province. A significant portion of this financial investment will directly benefit Loyalist Township and its community. While the construction phase is the most visible, all three phases bring revenue into Loyalist Township.

Documents, Reports and Assessments available on the website include:

- ◆ Project Description Report
- ◆ Draft Construction Plan Report
- ◆ Draft Decommissioning Plan Report
- ◆ Draft Design & Operations Report
- ◆ Draft Noise Impact Assessment

- ◆ Draft Turbine Specifications Report
- ◆ Draft Visual Impact Report
- ◆ Draft Cultural Heritage Assessment
- ◆ Draft Archaeological Assessment
- ◆ Draft Natural Heritage Assessment
- ◆ Draft Water Body Report

Ernestown Wind Park Concern Resolution Process (detailed further on the site):

The Ministry of the Environment recommends that renewable energy projects have a formal plan for concern resolution.

Ernestown Wind Park Inc encourages people to contact them by e-mail, phone or mail as soon as they have a question or concern and depending on how complicated the question or concern, may take a few days to respond. When you write please include as many details as possible so that your message is more effective, including the relevant paragraph in the legislation governing renewable energy in Ontario. The Environmental Protection Act can be viewed on the Ministry of the Environment’s website. If the Ernestown Wind Park receives Renewable Energy Approval and you still have concerns, there will be a period of time during which the public can appeal to the Environmental Registry.

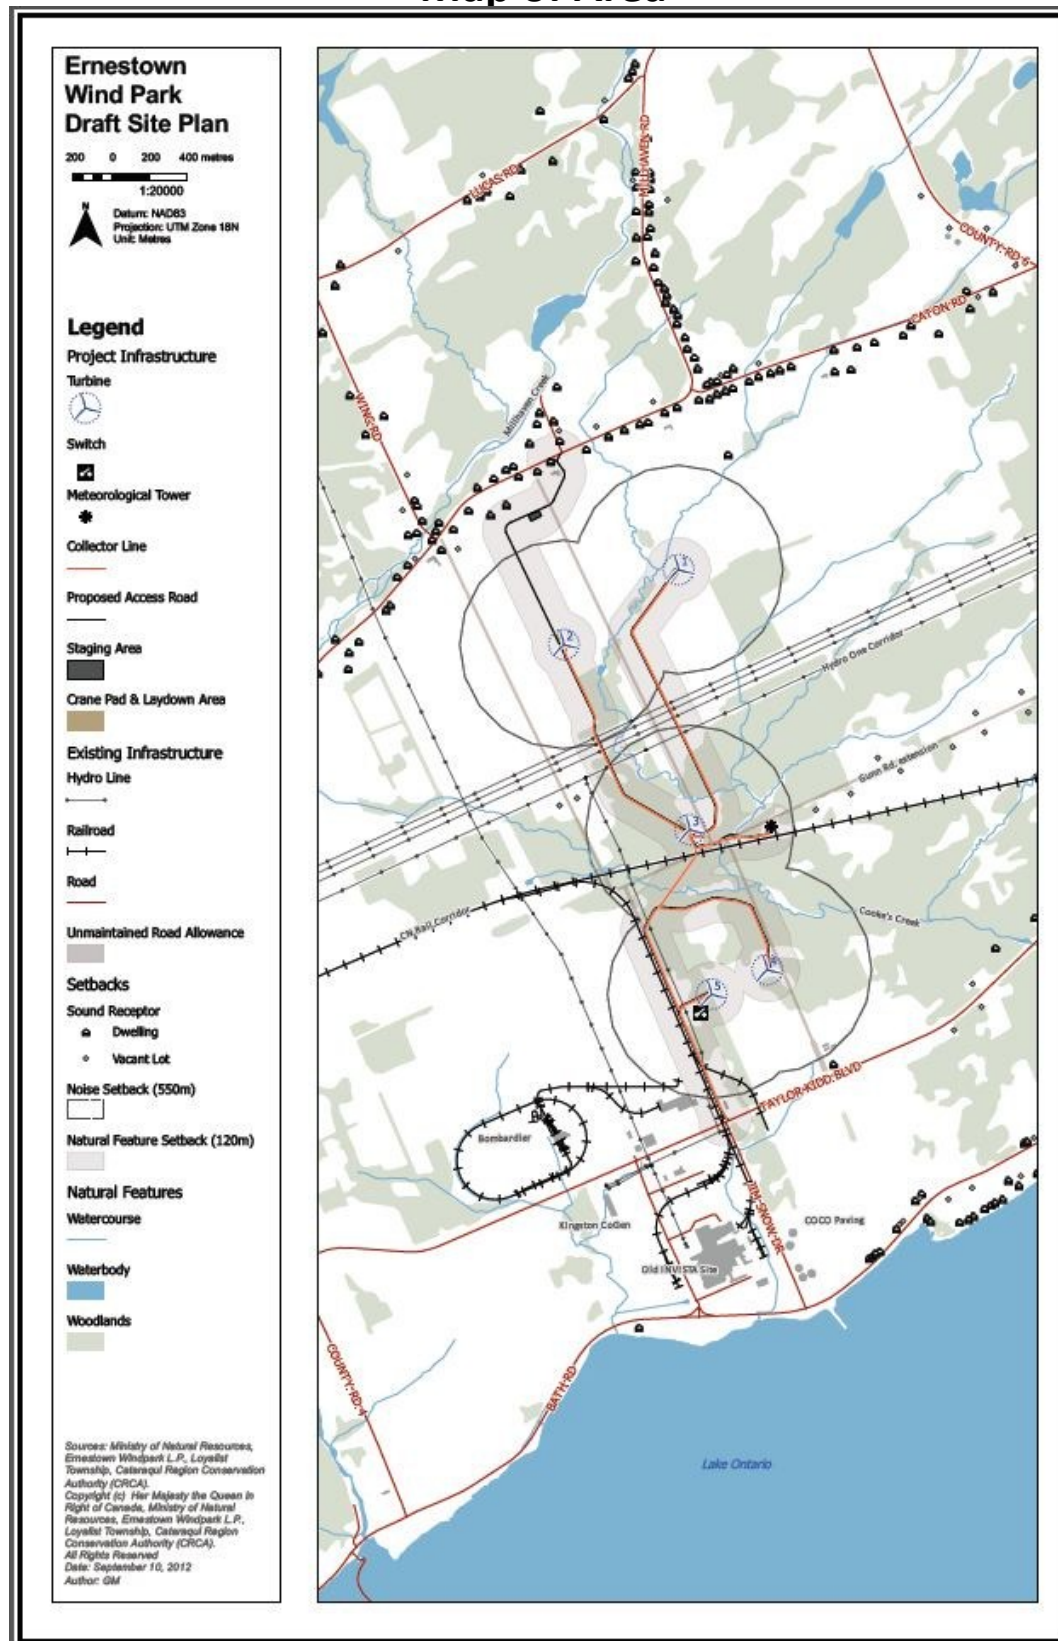

Construction:

Construction is tentatively scheduled to start in spring of 2013 with a late fall completion. Construction traffic and activities will be carried out in accordance with Township by-laws. For more details on construction of the wind park, please see the construction report and transportation plan.

SENT VIA REGISTERED MAIL

December 13th, 2010

Consultation Unit
Métis Nation of Ontario
500 Old St. Patrick Street, Unit 3
Ottawa, ON.
K1N 9G4

Good day,

we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in an Aboriginal consultation process for this project. As such, we respectfully request an opportunity to come before Chief and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Aboriginal consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

Jean-Francois,

The Métis Nation of Ontario does not have a "Chief and Council" as it is not an Indian band.

Please take some time to review our website as it will be useful to improving your understanding of who the Métis are in Ontario. You may also wish to speak with the regulatory authority associated with your project regarding the duty to consult and accommodate rights-bearing Métis communities in Ontario.

<http://www.metisnation.org>

In the meantime, James Wagar, Consultation Coordinator, will forward the information you have provided to the potentially affected communities for their review and consideration.

Melanie Paradis

February 28th, 2011

Dear Mrs Paradis & Mr. Wagar,

we are writting you to follow up with the letter sent on December 14th 2010 and the e-mail sent on January 2011, including (4); an introduction letter, the Ernestown Newsletter issued, the Ernestown Draft project description report published and the Notice of a Proposal & Public meeting. The Metis Nation opinions regarding this project are important to us.

In order to receive the feed-back of the potentially affected Metis communities, we are inviting them to a meeting to introduce the Ernestown Wind Park project. Please let us know if any Metis communities are interested and we will schedule a meeting at their convenience.

Meanwhile, should you have any question, feel free to contact me.

Yours very truly,

--

Subject: Ernestown Wind Park

As you know, the Métis are one of three Aboriginal peoples in Canada, whose rights, interests, and way of life are constitutionally protected under section 35 of the Constitution Act 1982. The Crown has a duty to consult the Métis before making a decision, taking an action or issuing an approval that could impact rights, interests or way of life.

The Métis Nation has Aboriginal rights in the lands, waters and natural resources within the area where this Project is located. The rights are held as collective rights, by the rights-bearing Métis community, as represented by the MNO.

Based on the information provided and under the stipulations that:

1. The project proceeds as presented in the provided notice documentation.
2. Ernestown Windpark Inc. regularly informs the MNO of the project's timeline, EA bench marks and any new developments.
3. The MNO and the regionally based Consultation Committee may request additional project information at any time.
4. A meeting to obtain additional information remains available as an option for the MNO and the regionally based Consultation Committee.

The MNO and the regionally based Consultation Committee believe that should the project proceed there would be no immediate adverse impacts to Métis rights, culture or way of life.

Please be aware that the rights-bearing Métis communities are regional in size and scope and our traditional territories are expansive. Therefore, we recommend and appreciate early notification when potential projects are identified, as there may be a number of MNO Community Councils involved for a single project location. MNO will be pleased to assist in determining which Community Councils and other governance structures within the MNO should be notified to ensure all citizens of the potentially affected rights-bearing Métis community have the opportunity to be engaged.

Going forward, we wish to stress that the MNO and its Community Councils wish to fully participate in consultation processes, but we currently have no capacity to review complex documents or to mount effective consultation without appropriate time and assistance. We receive many notices, almost all of which propose to affect our Aboriginal rights and many of which involve complex and far-reaching initiatives. A response, much less a timely one, is often problematic under these conditions, which we hope to change. The courts have made it clear, however, that when our Aboriginal rights may be affected, we must be engaged early and in a meaningful way.

The MNO wishes to formally clarify to you that discussions with MNO staff does not constitute consultation. Discussions between Ernestown Windpark Inc. and MNO can only be considered part of the consultation process when the democratically elected representatives of the rights-bearing Métis community are present and acknowledge that the work being undertaken is part of the consultation process.

If you have any questions regarding this letter, please contact the staff support person for this file: James Wagar at

We look forward to continuing to build and develop this positive relationship in the future.

Yours truly,

James Wagar

Dear Ms. Paradis and Mr. Wagar,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

Draft Project Description Report

Draft Construction Plan Report

Draft Decommissioning Plan Report

Draft Design and Operations Report

Draft Noise Impact Assessment Report

Draft Turbine Specifications Report

Draft Transportation Plan Report

Draft Visual Impact Study

Draft Cultural Heritage Assessment

Draft Archaeological Heritage Assessment

Draft Natural Heritage Assessment

Draft Water Body Report

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

Ernestown Windpark Inc. as general partner of Ernestown Windpark LP

2300 Yonge Street Suite 801, PO Box 2300, Toronto, Ontario, Canada M4P 1E4
phone: (416) 864-9977 fax: (416) 864-9568 web: www.ernestownwind.com

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

SENT VIA REGISTERED MAIL

December 13th, 2010

President Wayne Trudeau
Northumberland Métis Council
140 Elder Rd. RR 4,
Roseneath, ON., K0K 2X0

Good day,

we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in a Métis communities consultation process for this project. As such, we respectfully request an opportunity to come before President and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Métis communities consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

Hello M. Wagar,
Wayne Trudeau, past President of Northumberland Metis Council, recommended that we communicate with you to undertake the Northumberland Metis community consultation in relation to our project. You can find below more information in this regards.

Please give us indications of the steps we must take to conduct a consultation with the Northumberland Metis community.

Yours respectfully,

--

Subject: RE: Ernestown Wind Park - Metis Communities Consultation
To: Jean-François Daoust

Thank you Jean,

Please see the attached response.

As an aside I would like to clearly explain due diligence in reference to this specific project. By notifying the Métis Councils, confirming with the MNO that the proper councils and personnel have been notified and regularly following up with the MNO satisfies communications at this point. In addition please note at a future date, should a meeting be requested a general PIC is not representative of meaningful consultation with the MNO.

Many Thanks

JW

Good Morning Mr. Wagar,
it was good to talk with you earlier today. I was pleased to learn that the consultation process undertaken

with the Ontario Metis Communities in relation to our proposed wind project appears to meet due diligence.
Should you need further information, please contact me.

Yours Respectfully,--
Jean-François Daoust, Project Manager

Subject: Ernestown Wind Park

As you know, the Métis are one of three Aboriginal peoples in Canada, whose rights, interests, and way of life are constitutionally protected under section 35 of the Constitution Act 1982. The Crown has a duty to consult the Métis before making a decision, taking an action or issuing an approval that could impact rights, interests or way of life.

The Métis Nation has Aboriginal rights in the lands, waters and natural resources within the area where this Project is located. The rights are held as collective rights, by the rights-bearing Métis community, as represented by the MNO.

Based on the information provided and under the stipulations that:

1. The project proceeds as presented in the provided notice documentation.
2. Ernestown Windpark Inc. regularly informs the MNO of the project's timeline, EA bench marks and any new developments.
3. The MNO and the regionally based Consultation Committee may request additional project information at any time.
4. A meeting to obtain additional information remains available as an option for the MNO and the regionally based Consultation Committee.

The MNO and the regionally based Consultation Committee believe that should the project proceed there would be no immediate adverse impacts to Métis rights, culture or way of life.

Please be aware that the rights-bearing Métis communities are regional in size and scope and our traditional territories are expansive. Therefore, we recommend and appreciate early notification when potential projects are identified, as there may be a number of MNO Community Councils involved for a single project location. MNO will be pleased to assist in determining which Community Councils and other governance structures within the MNO should be notified to ensure all citizens of the potentially affected rights-bearing Métis community have the opportunity to be engaged.

Going forward, we wish to stress that the MNO and its Community Councils wish to fully participate in consultation processes, but we currently have no capacity to review complex documents or to mount effective consultation without appropriate time and assistance. We receive many notices, almost all of which propose to affect our Aboriginal rights and many of which involve complex and far-reaching initiatives. A response, much less a timely one, is often problematic under these conditions, which we hope to change. The courts have made it clear, however, that when our Aboriginal rights may be affected, we must be engaged early and in a meaningful way.

The MNO wishes to formally clarify to you that discussions with MNO staff does not constitute consultation. Discussions between Ernestown Windpark Inc. and MNO can only be considered part of the consultation process when the democratically elected representatives of the rights-bearing Métis community are present and acknowledge that the work being undertaken is part of the consultation process.

If you have any questions regarding this letter, please contact the staff support person for this file: James Wagar at

We look forward to continuing to build and develop this positive relationship in the future.

Yours truly,

James Wagar

June 21st, 2012

Northumberland Métis Council
140 Elder Road, RR4
Roseneath, ON, K0K 2X0
President Wayne Trudeau w_trudeau@yahoo.ca
Phone 905-352-3124

Dear Mr. Trudeau and Council,

Reference: Ernestown Wind Park Documents Forthcoming for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. The project is located approximately 110km east of the Northumberland Métis community. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project will be made available to you in the coming months for review. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we will be circulating the following draft assessment reports shortly:

- | | |
|---|---|
| Draft Project Description Report | Draft Transportation Plan Report |
| Draft Construction Plan Report | Draft Visual Impact Study |
| Draft Decommissioning Plan Report | Draft Cultural Heritage Assessment |
| Draft Design and Operations Report | Draft Archaeological Heritage Assessment |
| Draft Noise Impact Assessment Report | Draft Natural Heritage Assessment |
| Draft Turbine Specifications Report | Draft Water Body Report |

With this letter, we are providing you with:

1. A draft of the Project Description Report;
2. Written summaries of the above reports that will be submitted as part of the REA application;
3. A map showing the distance from your community to the Project.

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. We invite you to a meeting in the second week of June, or at your earliest convenience, for a more fulsome discussion.

Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

Nhung Nguyen
VP Development

SENT VIA REGISTERED MAIL

December 13th, 2010

President Tom Thompson Jr.
Seven Rivers Métis Council, Box 74
Northbrook, ON., N0H 2G0

Good day,

we are writing to inform you of a proposed wind project development known as the Ernestown Windpark, located in Loyalist Township, Ontario, and to invite your participation in a Métis Communities consultation process for this project. As such, we respectfully request an opportunity to come before President and Council to introduce ourselves as the people behind the development proposal, to share information, and to engage your involvement. We also offer you to hold an open house for your community in the last week of January 2011, or at your convenience.

This development is being proposed on privately owned lands with industrial and agricultures zoning by Ernestown Windpark Inc. We are a family owned company that has many years of expertise in the construction and development business, and have already completed two community-friendly wind projects in North America. This project will play a part in promoting clean and sustainable energy to the benefit of this and future generations, while enhancing economic development in the local region.

This project is undergoing a Renewable Energy Approval (REA) process in accordance with Ontario Regulation 359/09. To facilitate your involvement and participation, we have included with this letter a Draft Project Description Report detailing specifics of this project. Additional documents and reports will be available for your review early next year.

Based on the studies performed to date, no adverse impacts to constitutionally protected aboriginal or treaty rights are anticipated from the proposed Ernestown Windpark. If, having reviewed the Draft Project Description, you or any member of your community have any additional information that, in your opinion, should be considered in the Renewable Energy Approval application or reports described above, and in particular, any information you may have about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those impacts, we respectfully request that you provide this to us in writing in 30 days.

Jean-Francois Daoust has been especially assigned to be your community liaison and will be readily available to answer questions and address your concerns. Please do not hesitate to contact him for any issues you may have. His contact information is found below.

We hope you will accept our invitation to meet us and engage in the Métis Communities consultation process and look forward to your positive response.

Sincerely,

Jean-François Daoust - Project Manager

February 28th, 2011

Dear President Tom Thompson Jr.,

we are writing you to follow up with the letter sent on December 14th 2010 and the e-mail sent on January 21st 2011, including (4); an introduction letter, the Ernestown Newsletter issued, the Ernestown Draft project description report published and the Notice of a Proposal & Public meeting. Your opinion regarding this project is important to us.

In order to receive your feed-back and discuss the project, we are inviting you to a meeting to introduce the Ernestown Wind Park project. Please just let us know if you are interested and we will schedule a meeting at your convenience.

Meanwhile, should you have any question, feel free to contact me.

Yours very truly,

--

1. General Information

This project description report is a component of the Renewable Energy Approval (REA) permitting process and complies with Ontario Regulation 359/09 (O.Reg. 359/09).

Ernestown Windpark Inc., as general partner of Ernestown Windpark LP, is proposing to develop a wind energy generation facility named Ernestown Wind Park, located in Loyalist Township, Ontario, to generate clean renewable energy for connection to the public grid. This project will promote long-term, low-impact energy that will complement Ontario's goals of clean and sustainable electricity generation, while impacting economic growth in the rural community.

1.1. Project Summary

Project Name: Ernestown Wind Park
Project Type: Wind Facility
Project Location: Private Lands
Ernestown, Ontario
Loyalist Township
Coordinates: 44°14' 8.71"N, 76°43'10.59"W, Datum: Nad 83
Number of turbines: 4-6
Nameplate capacity: 10 MW

1.2. Project Contacts

Proponent: Ernestown Windpark Inc., as general partner of Ernestown Windpark LP
2300 Yonge Street
Suite 801, PO Box 2300
Toronto, ON
M4P 1E4
Tel: 1-877-389-4099
Fax: 1-416-864-9568

Contact: Nhung Nguyen
Project Manager
Email: info@ernestownwind.com

1.3. Authorizations Required

The project will follow the permitting and approvals requirements in *O. Reg 359/09* and MNR's *Approval and Permitting Requirements Document for Renewable Energy Projects* (MNR, Approvals). Below is a list of authorizations required by key stakeholders. This list will grow as the project progresses and as per stakeholder requirements:

Table 1: Federal Authorization

Item	Responsible Authority
Navigational Clearances	Transport Canada

Table 2: Provincial Authorization

Item	Responsible Authority
Grid Interconnection	Hydro One Networks
Transportation Permit	Ministry of Transportation
Connection License	Ontario Energy Board
Renewable Energy Approval	Ministry of Environment
Ministry of Tourism and Culture	

Table 3: Municipal Authorization

Item	Responsible Authority
Building Permit	Loyalist Township

Consultation with the various Ministries and Government organizations are required, including:

Table 4: Other Agency Notification and Consultation

Agency	Level
Canadian Environmental Assessment Agency (CEAA)	Federal
Natural Resources Canada	Federal
Environment Canada	Federal
Department of Fisheries and Oceans	Federal
CN Rail	Federal
Department of Indian & Northern Affairs	Federal
NAV Canada	Federal
Department of National Defense	Federal
Canadian Coast Guard	Federal
Radio Advisory Board of Canada	Federal
Ontario Ministry of Natural Resources	Provincial
Ontario Ministry of Aboriginal Affairs	Provincial
Ontario Ministry of Energy and Infrastructure	Provincial
Ontario Ministry of Culture	Provincial
Ontario Ministry of Tourism and Recreation	Provincial
Ontario Ministry of Aboriginal Affairs	Provincial

Ontario Ministry of Transportation	Provincial
Cataraqui Conservation Authority	Municipal
City of Kingston	Municipal

1.4. Federal Involvement

This project is not expected to trigger a Federal Environmental Assessment. The study area is on private lands and federal funding is not expected.

2. Project Information

The purpose of the project is to generate clean energy from wind and make it available to Ontario's electricity grid. The project is participating under Ontario's Feed-in Tariff (FIT) program and currently holds a conditional FIT contract. The FIT program is part of Ontario's Green Energy and Economy Act. Project highlights are below:

- Proponent: Ernestown Windpark Inc., as general partner of Ernestown Windpark LP
- Technology Type: Wind Energy
 - Class 4 Wind Facility - no contact with surface water or wetland; ≥ 102 dB
- Expected Wind Turbine Generators: 4-6 Nameplate Capacity: 10 MW

The Project Study Area is shown below:

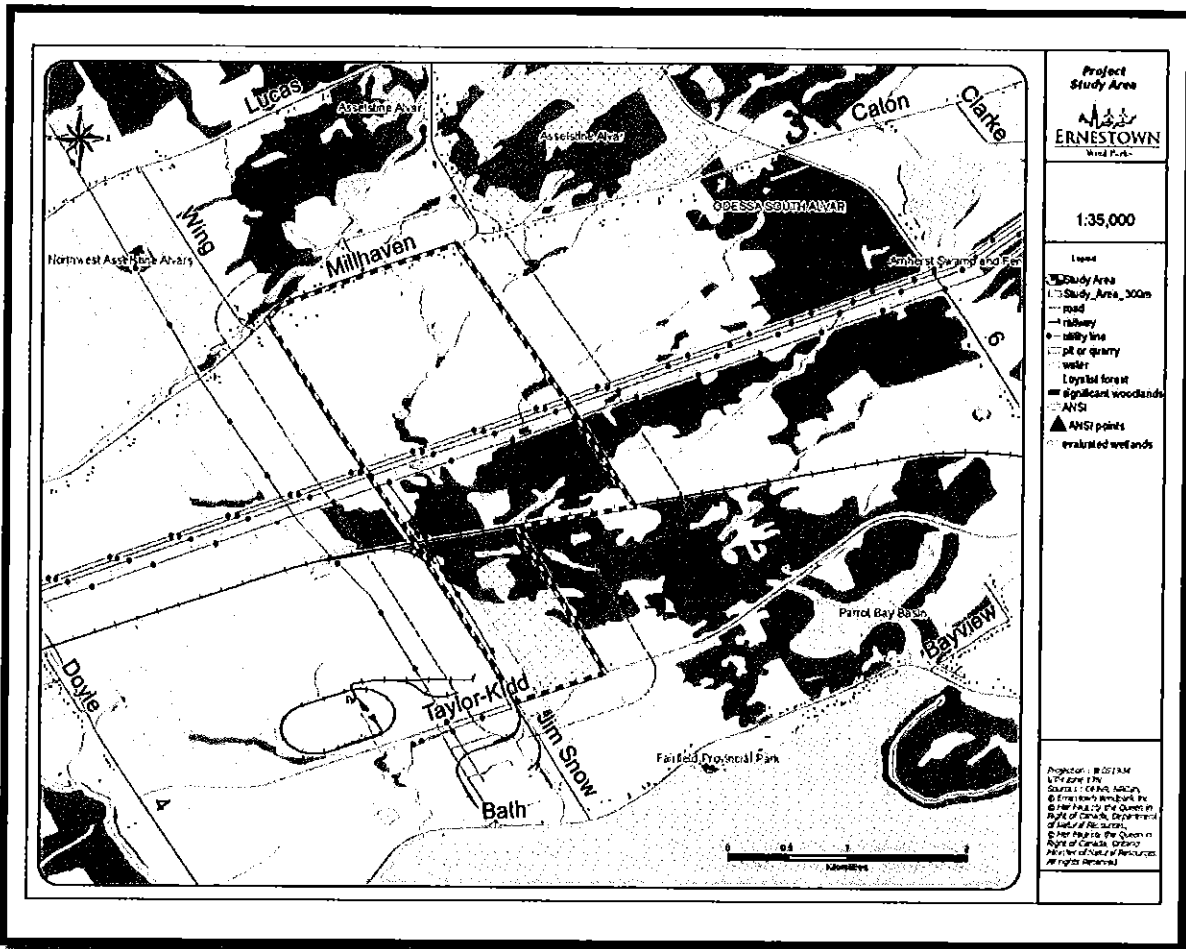

FIGURE 1 - PROJECT STUDY AREA

2.1. Energy Source

Wind will be the energy source used for this facility. The project has taken over 12 months of wind measurements through the use of a MET tower located adjacent to the project study area and the data has deemed the wind source viable.

2.2. Project Components

The Ernestown Wind Park will be made up of wind turbine generators (WTG), access roads and crane pads, transformers, collector system, power lines, substations, and temporary storage infrastructure. The project will be situated on approximately 650 acres and will consist of between 4-6 WTG, for a total nameplate capacity of 10 MW. Various turbine technologies are being evaluated and will be indicated in the final Renewable Energy Approval Report.

The turbines will be interconnected by less than 5km of internal access roads and underground wiring. The turbines will each require an intermediate transformer, situated at the base of the tower structure. The project will interface to the local power grid through a step-up transformer, with additional permanent hydro poles and/or power lines of less than 12km to connect to Hydro One Network's local 3-phase 44kV power grid. The electrical tap line may go along existing hydro corridor right of ways.

Wind Turbines

Most modern utility scale wind turbines consist of three components: 1) the tower section which sits on a foundation, 2) a generator situated on top of the tower and housed in the nacelle, and 3) a three bladed rotor. The tower can be of tubular steel, concrete, wooden, or even lattice design; each has its advantages and drawbacks. The blades are made of fibre-glass or carbon fibre, and come equipped with a variable pitch system to optimize energy output. Blades can also have integrated lighting protection by the presence of a thin copper wire running from the tip to the hub, and down the tower to the ground.

An anemometer at the top of the turbine measures wind, and a yawing mechanism allows the turbine to slowly turn toward the wind to maximize energy production. Turbines have an effective operating wind speed range, defined by the cut-in and cut-out wind speed. Beyond the cut-out wind speed, the turbines automatically stop working. The turbines have a dedicated telecommunication link via satellite, telephone, or fibre-optic allowing for Supervisory Control and Data Acquisition (SCADA) monitoring at a remote control center.

Table 5: Facility Components

Item	Info
Wind Turbine	80-108 meter hub height* Blade length: 35-42m Blade sweep area: 77-82m Sound rating: 104 dB(A) Concrete foundation
Access roads	Internal to lands, <5 km expected; Culvert may be required
Power System	Distribution lines: 44 kV

* Some suppliers provide the option of upgrading up to 138m hub height. This is dependent on final selection of supplier.

2.3. Renewable Energy Generation Class

As outlined in Part II of O. Reg 359/09 section 6, the proposed wind project is expected to be a **Class 4 Wind facility** as its nameplate capacity is >50 kW, no part of the turbine is located in direct contact with surface water, and the turbine sound rating may be up to 104 dB(A).

2.4. Project Activities

The proposed 10 MW wind facility requires a multi-year development timeline and consultation with many stakeholders. Here are some major milestones:

- **Wind resource tower installation and measurements** - Completed
- **Power Purchase Agreement** – Completed
- **Public announcements and meetings** - "Notice of a Proposal and Public Meeting" was posted in the Kingston Whig Standard on May 29th & 31st and Kingston EMC June 3rd & 10th. Notices have been delivered to land owners living at least 120m (and in some cases up to 9km) from the project study area. Open houses are being held in Loyalist Township and Kingston on June 29th and June 30th at the Amherstview Community Hall and the Invista Centre respectively. Future open houses are planned and details will also be announced by newspaper. A project website has been created online at ernestownwind.com to communicate information to the public, stakeholders, and agencies.
- **Renewable Energy Approval Process** – Underway

The construction phase will have the following key activities:

Table 6: Construction (*subject to change*)

Construction Phase	Details
Site Preparation	Site & Preconstruction Surveys Grading and road improvements Access road construction Trenching, cable laying Foundation construction Crane pad construction Fencing, gates, Transformer pad
Electrical Installation	Property rights, tendering Line upgrades Transformer installation, grid connection
Turbine Installation	Turbine assembly, installation, erection Commissioning
Site Restoration	Site cleanup, equipment removal, restoration

Table 7: Operation and Maintenance (*subject to change*)

O&M Phase	Details
Turbines	Remote status monitoring Site grounds keeping No O&M building on-site
Access roads	Weed control, snow removal

Table 8: Decommissioning (*subject to change*)

Decommissioning Phase	Details
Turbines	Removal of turbine infrastructure and tower Turbine foundation removal to tillage depth
Electrical	Underground and above-ground line and pole removals Transformer removal
Site Restoration	Gate removals Site cleanup, equipment removal Access road removal & restoration

Off-site land use will be limited.

2.5. Nameplate Capacity

The contracted wind facility is for 10 megawatts:

- 10 MW total nameplate project capacity
- 4-6 turbines
- 1.5-2.5 MW nameplate per turbine

2.6. Land Ownership

The proposed wind project resides entirely on privately held lands. No Crown lands are located within the project study area.

3. Description of Environmental Effects

Best efforts are being made to ensure minimal environmental impact of the proposed wind facility. Based on a preliminary records review, the proponent does not expect significant environmental impact from the construction and operation of the wind facility.

Possible negative environmental effects on intermittent or permanent streams have been identified. This may occur during the construction phase for required access roads. Consultation with stakeholders and mitigation measures will be in place to ensure minimal impact.

3.1. Preliminary Site Visit

A site visit has been conducted to confirm the presence of known natural heritage features identified from the records review as well as to identify any additional (or other) natural heritage features not revealed during the records review. Findings of the site visit will be detailed in the *Natural Heritage Assessment Report* as part of the Renewable Energy Approval Reports.

3.2. Setbacks

The proponent expects the project location to reside beyond the minimum setback distances required. Should final turbine locations reside within the setback zones, then further studies and reports may be required.

3.3. Heritage and Archaeological Effects

Records reviewed from the Ontario Heritage Properties yielded no listed properties and heritage impact within 300 metres of the project study area. Further consultation with the Ministry of Culture is required to verify findings. The National Historic Sites of Canada database also yielded no presence of historic sites, conservation areas or national parks (Parks Canada, NHS).

Archaeological impact is possible and a stage I archaeological assessment will be carried out. At MNR's suggestion, a pedestrian survey may also be conducted.

As per REA requirements, a Cultural Heritage and Archaeological Assessment Study will be carried out and submitted for review to the Ministry of Tourism and Culture (MTC).

3.4. Natural Heritage Resources

A natural heritage assessment is required for proposed renewable energy projects to determine the presence of the following natural heritage features:

- Wetlands (PSW, unevaluated, other)
- Lands subject to the Oak Ridges Moraine Conservation Plan, Niagara Escarpment Plan, Greenbelt Plan)
- Provincial parks and conservation reserves
- Significant woodlands; valleylands and wildlife habitat
- Endangered species and/or habitat, and
- Fish and fish habitat

The project's study area is outside of any ANSI, provincial parks and conservation areas. Little to no impact is expected.

The project does not reside in the Greenbelt's protected countryside or Oak Ridges Moraine. The local conservation authority, the Cataraqui Region Conservation, does not list any conservation areas within the study area.

3.4.1 Records Review

The following table lists the information sources that were used to determine the presence of known natural heritage features within and adjacent (i.e. 120m) to the project location.

Table 9: Information Sources – Natural Heritage

Source	Available Data
Ontario Renewable Energy Resources Atlas	Bat hibernacula; ANSI's, Conservation reserves; Provincial Parks
Ontario Breeding Bird Atlas	Rare bird species ranges and occurrences
Frogwatch	Seasonal concentration areas (anurans)
Important Bird Areas (IBA) database	Seasonal concentration areas (birds)
Central Cataraqui Region Natural Heritage Study	Various flora and fauna, natural heritage and water resources data
MNR Peterborough District Office	Species at Risk; Wetlands; Fisheries data
Cataraqui Region Conservation Authority	Hazard lands, Flood lines
Aquatic Species at Risk Distribution Maps	Rare fish and fish habitat
NHIC Biodiversity Explorer	Rare plant, animal and vegetation community occurrences; wildlife concentration areas; provincially significant natural areas
Loyalist Township OP and Zoning By-law	Environmental Protection/Hazard Lands

The following table lists the natural heritage features that were identified from the records review within and adjacent to the project location.

Table 10: Natural Heritage Features

Natural Heritage Features Identified from the Records Review
Wetlands (PSW and unevaluated)
Significant woodlands
Significant valleylands
Protected species and/or habitat

Below are some results from MNR's Biodiversity Explorer for the study area.

Table 11: Natural Features Biodiversity Explorer

Natural Feature	Present
Conservation Areas	No
Provincial Parks	No
Parrot Bay	No
Odessa North Alvar	No
Asselstein Alvar	No
Odessa South Alvar	No
Bayview Bog	No
Amherst Swamp and Fen	Yes
Collins Creek	Yes

3.4.2 Site Investigation

A site investigation was undertaken to confirm the presence of known natural heritage features identified from the records review as well as to identify any additional (or other) natural heritage features not revealed during the records review.

The following table lists the additional natural heritage features that were identified from the site investigation.

Table 12: Natural Heritage Features - Site Visit

Natural Heritage Features Identified from the Site Investigation
Wetlands (other)
Significant wildlife habitat
Fish and fish habitat

3.4.3 Significance Evaluation

An evaluation of the significance of a natural heritage features is not required if the project location is at least 50 meters outside of all areas of natural and scientific interest (ANSI) and at least 120 meters outside of natural features other than an ANSI (O. Reg. 359/09, s. 27(5)).

Natural heritage features located on or within 120m of the project location that were identified during the records review and site investigation will be evaluated to confirm and/or determine their significance during the subsequent detailed Natural Heritage Assessment.

A Natural Heritage Assessment report will be prepared and submitted to the MNR for review and comments in accordance with section 28(1) of the REA regulation. The comments and a letter of confirmation provided by the MNR will be submitted to the MOE as part of the REA application.

3.4.4 Potential Negative Effects

A number of significant natural heritage features occur within the project location. A summary of the potential negative environmental effects on the identified natural heritage features resulting from each phase of the wind energy project is provided in the following table.

Table 13: Potential Negative Effects – Natural Heritage

Project Phase	Potential Effect
Construction (turbines, access roads, transmission lines, transfer station, etc.)	Loss of Endangered species habitat Loss or disruption of significant wildlife habitat Disruption and/or displacement of area sensitive species Interference or loss of unevaluated/other wetlands Disturbance or loss of significant woodlands
Operation	Interference or disruption of fish habitat Endangered species habitat displacement (i.e. avoidance behavior) Mortality of resident or migratory birds and/or bats
Decommissioning	Loss or disruption of significant wildlife habitat Disruption and/or displacement of area sensitive species Interference or disruption of fish habitat

An Environmental Impact Study (EIS) will be required since the proposed wind project is located within 120 meters of significant natural heritage features. The purpose of the EIS is to assess in detail the negative environmental effects that will potentially occur and to determine measures to protect and/or mitigate impacts on the natural features. The EIS will be submitted concurrently with the submission of the Natural Heritage Assessment report.

3.5. Water Bodies

A water body assessment is required for proposed renewable energy projects to determine the presence of the following surface water features:

- Lake
- Lake trout lake
- Permanent or intermittent stream
- Hazard lands and floodplains, and
- Groundwater seepage area

3.5.1 Records Review

The following table lists the information sources that were used to determine the presence of known surface water features within and adjacent (i.e. 120m) to the project location.

Table 14: Water Bodies Information Sources

Source	Available Data
Ontario Renewable Energy Resources Atlas	Lakes; streams
Cataraqui Region Conservation Authority	Hazard lands; Flood lines
Loyalist Township OP and Zoning By-law	Environmental Protection/Hazard Lands
MNR Regional Office	Lake trout lakes

The following table lists the surface water features that were identified from the records review within or adjacent to the project location.

Table 15: Water Feature Identified - Records

Surface Water Features Identified from the Records Review
Streams (no stream flow characteristics provided)
Lakes
Hazard lands

3.5.2 Site Investigation

A site investigation was undertaken to confirm the presence of known surface water features identified from the records review as well as to identify any additional (or other) surface water features not revealed during the records review.

The following table lists the additional surface water features that were identified from the site investigation.

Table 16: Water Features Identified – Site Visit

Surface Water Features Identified from the Site Investigation
Permanent and intermittent streams
Hazard lands (other wetlands)
Seepage area

3.5.3 Significance Evaluation

The REA regulation does not require an evaluation of the significance for water body features.

3.5.4 Potential Negative Effects

Table 17: Potential Negative Effects – Water Features

Project Phase	Potential Effect
Construction (turbines, access roads, transmission lines, transfer station, etc.)	Interference with surface water drainage Interference with groundwater recharge/discharge Disruption or alteration of surface water quality/quantity Increased sedimentation and stream erosion Incidental spills or water contamination
Operation	Minor additional effects expected
Decommissioning	Similar effects as during construction

A detailed environmental effects assessment will be required if a wind power facility (i.e. wind turbine structure) is located within 120 meters of the high water mark of a permanent or intermittent stream or within 120 meters of a seepage area. The high water mark for the permanent and intermittent streams that occur within the project location will be defined during the detailed Water Body Assessment. If required, the environmental effects assessment will also be submitted as part of the water body assessment.

3.6. Air, Odour, Dust

The construction plan will include mitigating measures for air, dust and odour effects. Temporary dust and emissions from construction vehicles are expected near the construction zone.

All vehicles used for construction will be inspected and required to be in compliance with the Ontario Ministry of the Environment and Ontario Ministry of Transportation's emissions standards. Strict adherence to these standards will limit nitrogen dioxide, sulphur dioxide, and other green house gas emissions to within acceptable levels.

Dust will be suppressed by water spray within the construction area and access roads used by construction vehicles. Effects are expected to be localized and temporary.

3.7. Noise

The project will generate noise during construction and operation. Construction related noise will be temporary and efforts will be made to keep construction activities limited to daylight hours.

The wind turbines will generate noise primarily from the wind blades passing through the air. The project will comply with REA requirements specific to acceptable noise receptor setbacks.

3.8. Land Use and Resources

As demonstrated in Loyalist Township's Official Plan (Loyalist, OP 19), the lands residing within the project's study area classified as:

Table 18: Land Use - Study Area

Project Study Area Land Use
Industrial
Aggregate
Agriculture
Hamlet (small village)

The primary land use is agriculture, confirmed by a site visit that identified beans and clover plantations as well as pasture growth. A quarry, hydro corridor, an informal dirt bike trail, railway, and a shooting range also exist within the study area.

The areas adjacent to the project study area (within 300 meters) include the Taylor Kidd Industrial Park, industrial areas, and agricultural areas. There is an environmentally protected zone north east of the study area and beyond 300 meters.

3.9. Provincial and Local Infrastructure

The transportation of wind turbine towers and components are expected to have a temporary effect on local traffic and roadways during the construction phase. New access roads within the project study area will be privately maintained.

The Township and County are being consulted to determine road capacity and potential impacts during the construction phase.

3.10. Public Health and Safety

These are some of the typical concerns raised in relation to wind energy facilities:

Common Public Health and Safety Concerns

Construction activity
Electric and Magnetic Fields (EMFs)
Ice throw
Low frequency noise
Turbine collapse

A review of data in combination with public consultation is underway. Findings are forthcoming and will be included in the REA report. However, many of these issues can be appropriately mitigated by setback distances. This project will follow Ontario's established setback guidelines as outlined in O. Reg 359/09.

3.11. Protected Areas under Provincial Plans and Policies

This project is not located in a Protected Countryside or Natural Heritage System as it does not reside in the Greenbelt zone.

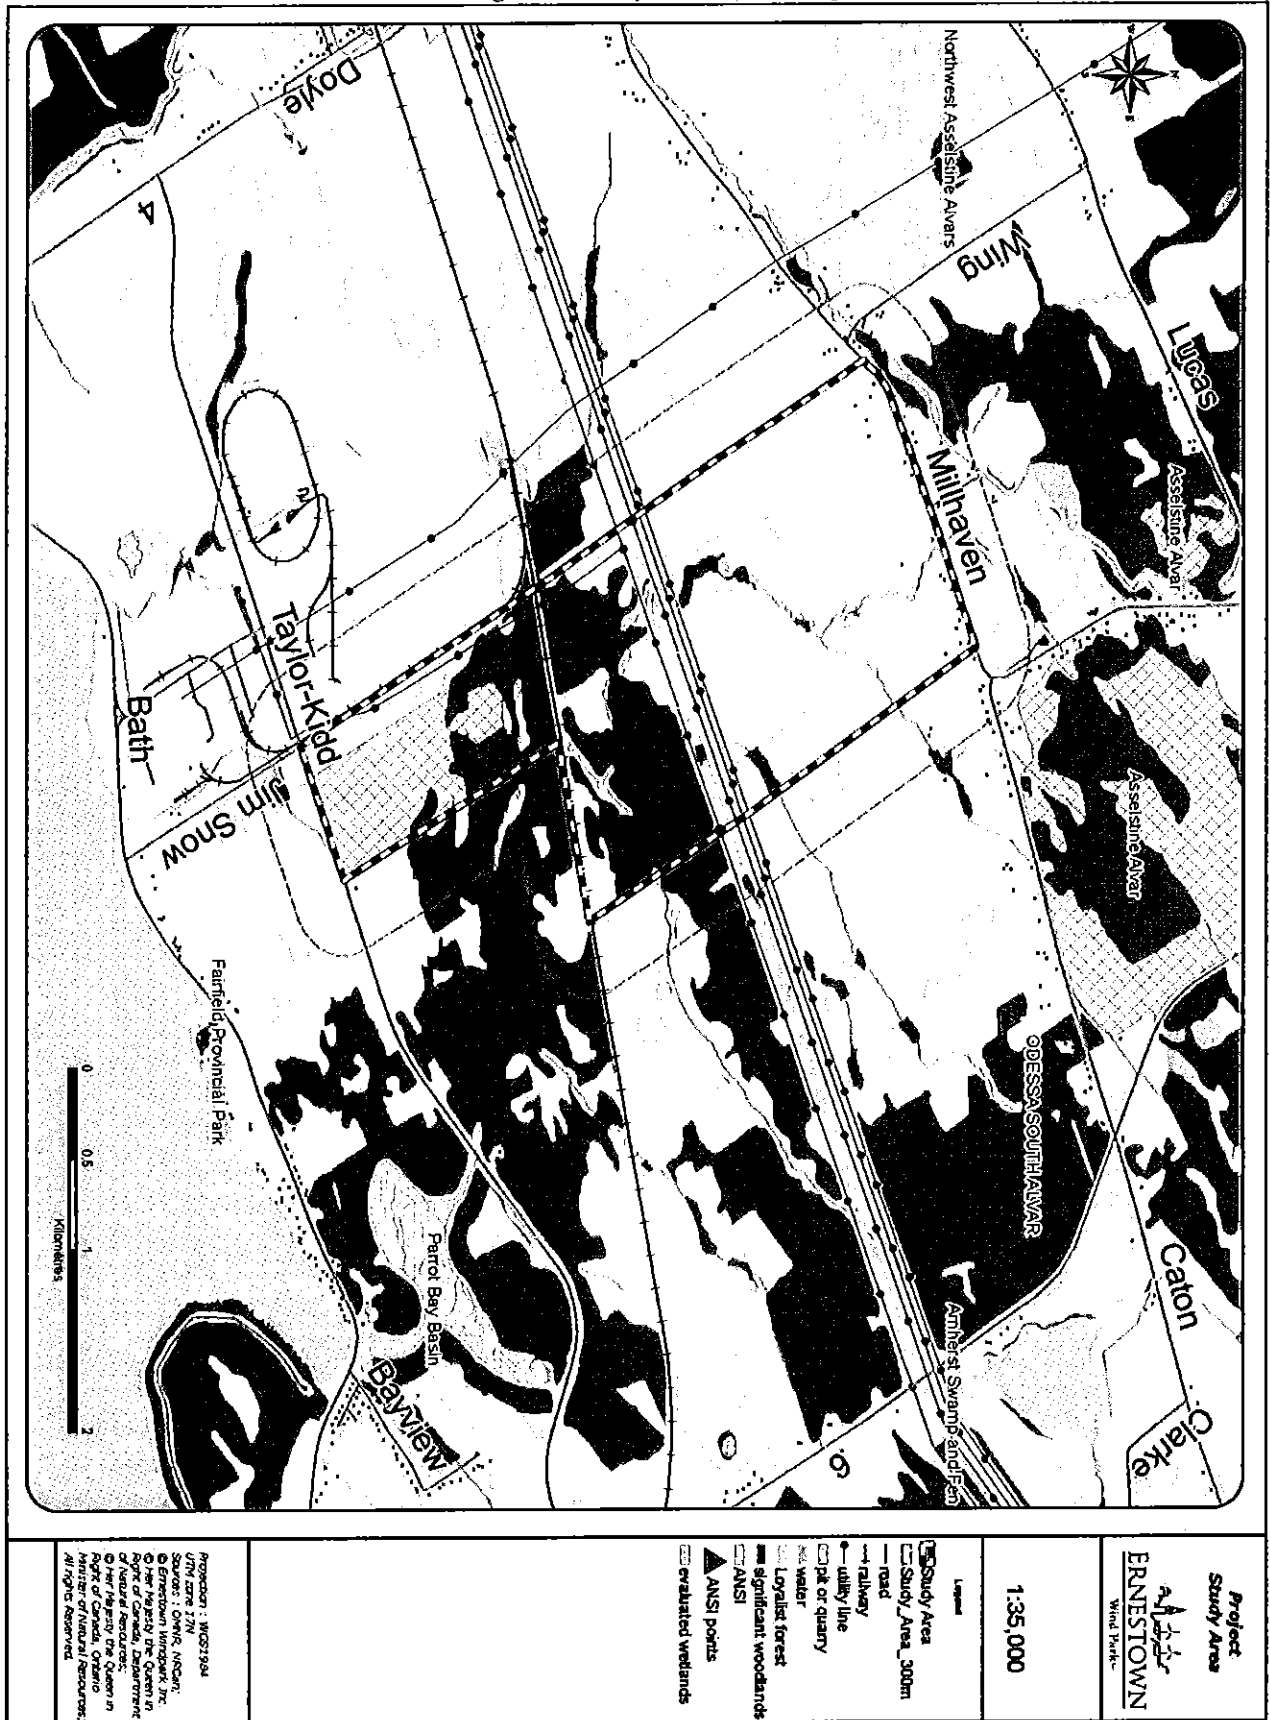

The project is not in the Oak Ridge Moraine Conservation Plan Area, the Niagara Escarpment Plan Area, or the Lake Simcoe Watershed Plan Area.

A records review of the study area resulted in no presence of Operating Parks, Provincial Parks, Conservation Areas, Nature Reserves, or area of natural and scientific interest (ANSI).

3.12. Project Location Map

Figure 2 below details a map of the project location.

Figure 2 – Project Location Map

4. Conclusion

This project description report is a component of the Renewable Energy Approval (REA) permitting process and complies with Ontario Regulation 359/09 (O.Reg. 359/09).

As a DRAFT version, this report is subject to updates as information becomes available from studies underway and stakeholder feedback. Updates will be posted on the project website, www.ernestownwind.com.

ERNESTOWN WIND PARK

REA REPORT SUMMARIES

Draft – 2012-05-23

Prepared by:

Ernestown Wind Park Inc.

as General Partner of Ernestown Wind Park LP

2300 Yonge Street, Suite 801

Toronto, Ontario, M4P 1E4

1.0 Project Information

Ernestown Windpark LP is proposing the development of the Ernestown Wind Park (the Project) located in Loyalist Township, the County of Lennox and Addington, Ontario. The project is located on privately owned land, municipally zoned as agricultural and industrial.

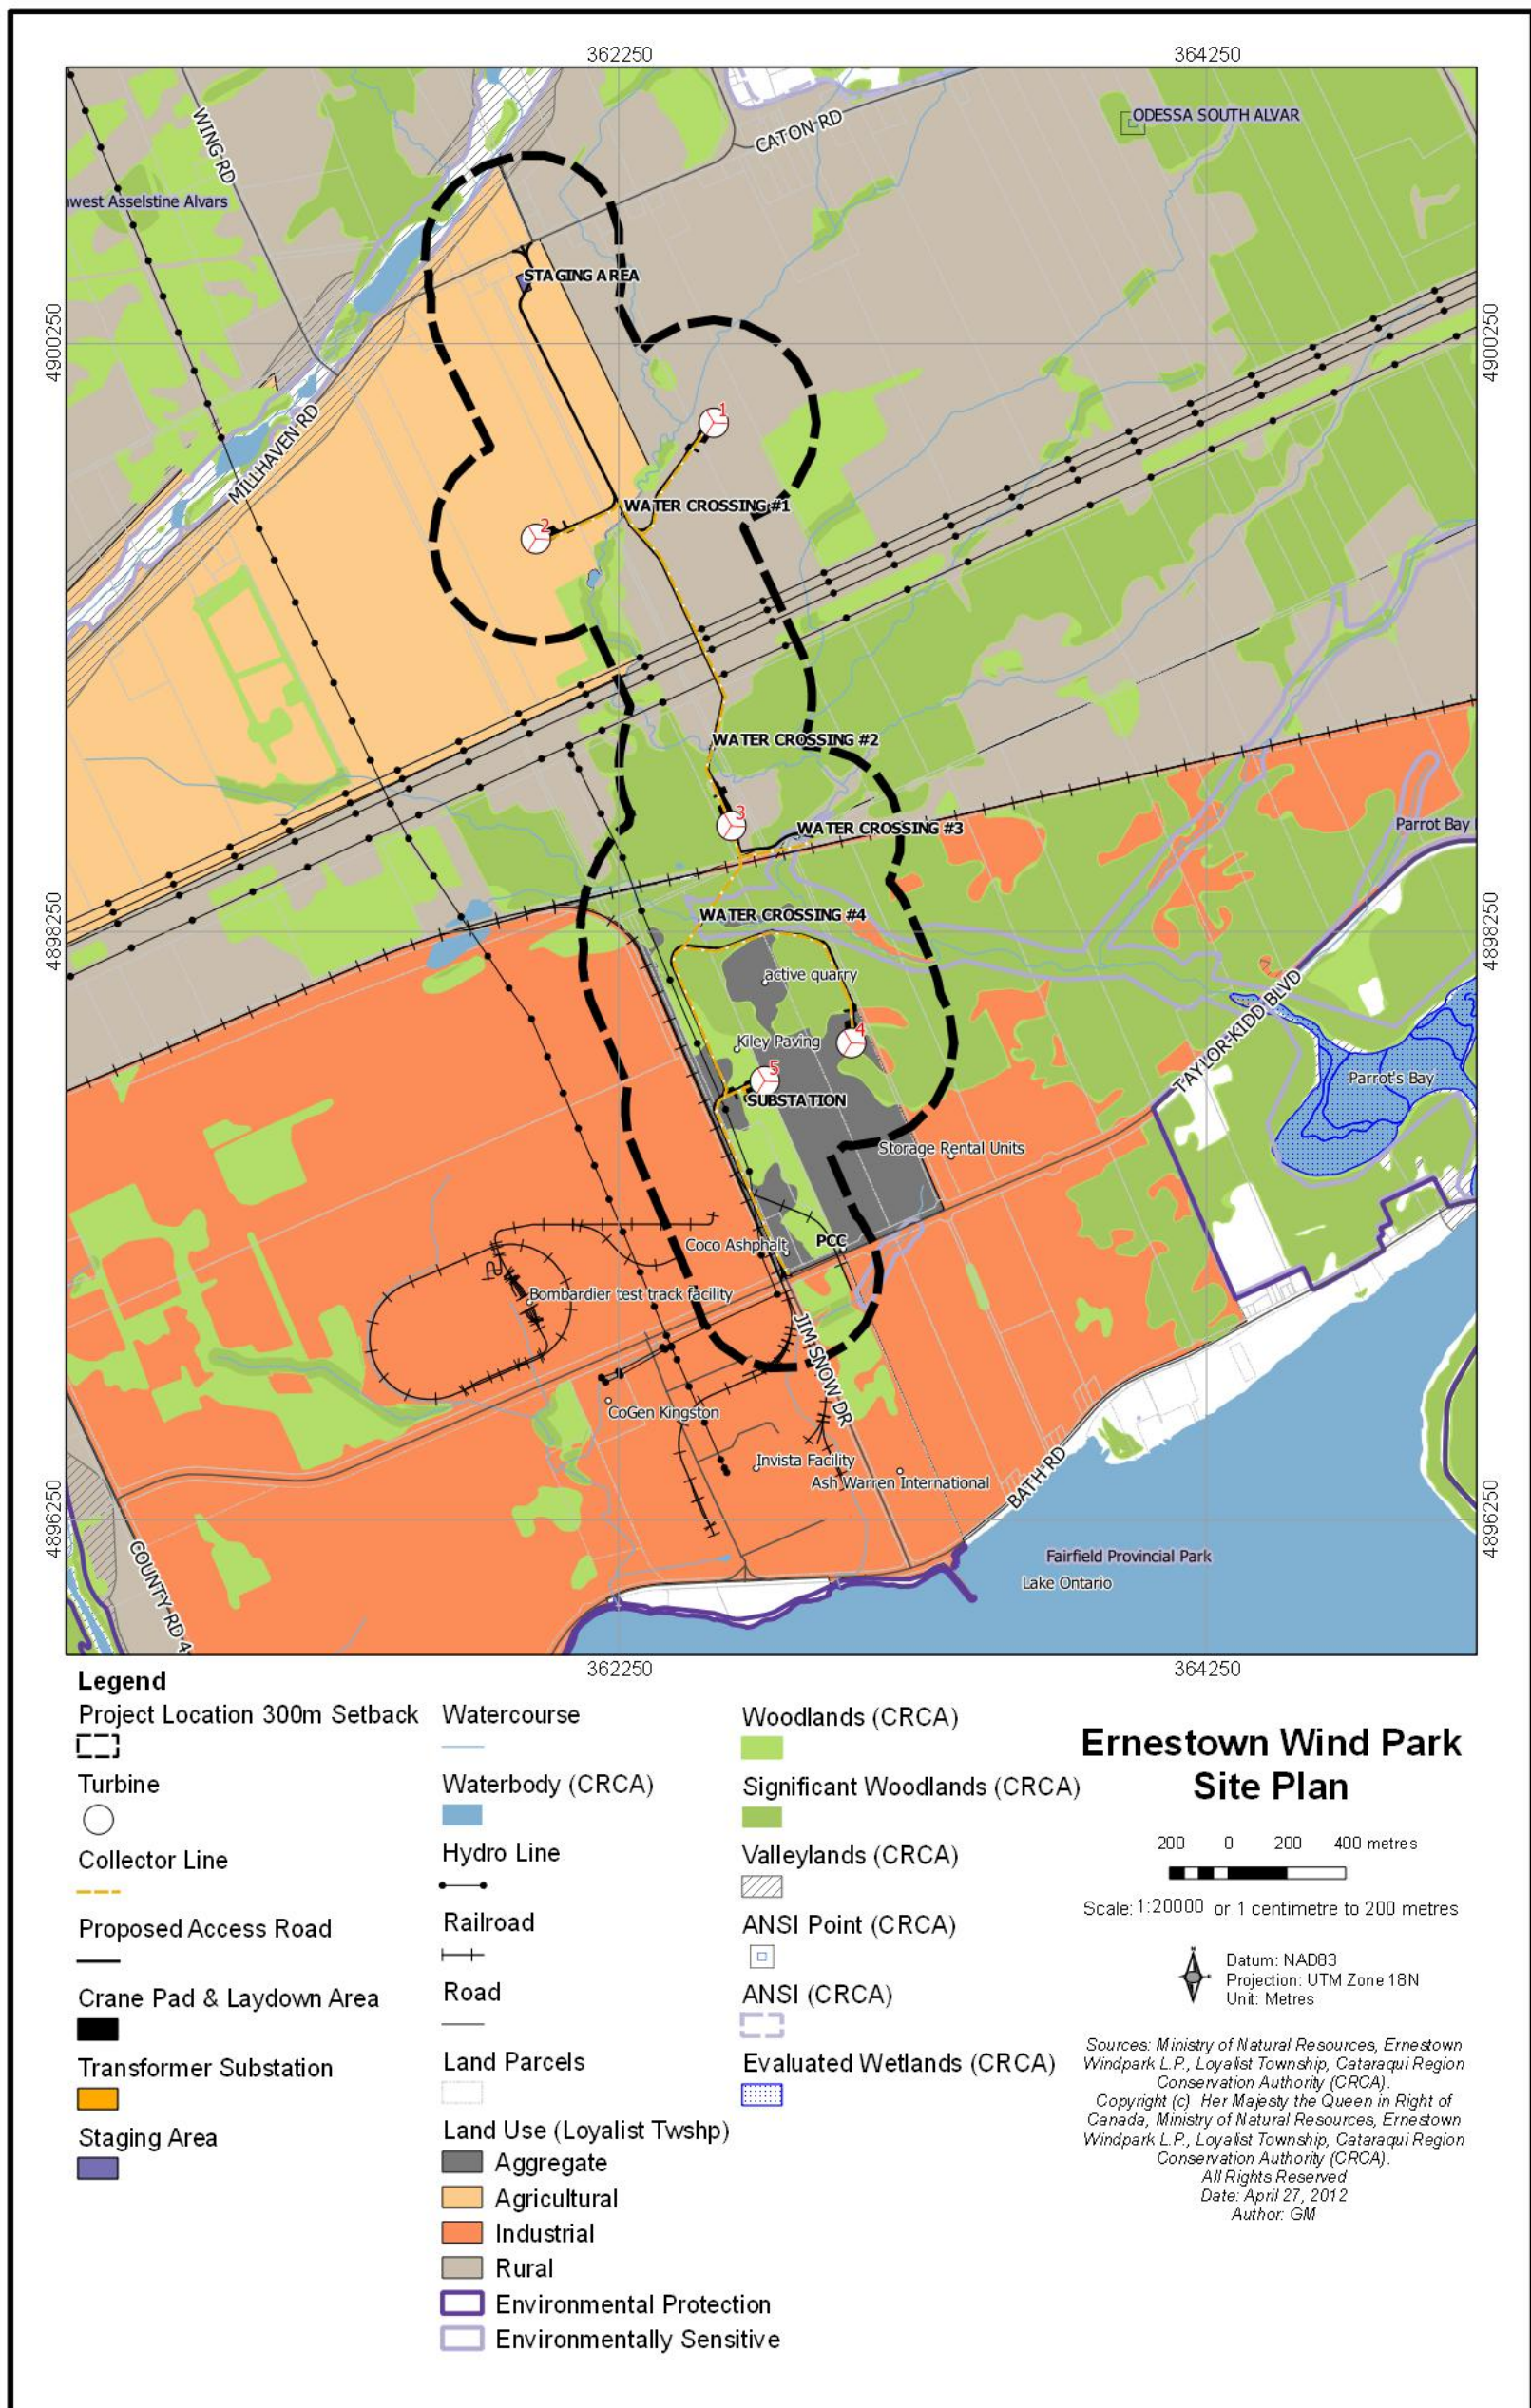

The Project involves construction, operation and decommissioning of five 2 MW wind turbines for a total name plate of 10MW. The proponent has not selected the final turbine model but has conducted noise modeling using the worst case scenario. The proponent is still continuing to negotiate with various turbine suppliers.

At time of the REA application submission, the proponent expects to have a finalized turbine model and will revise the noise modeling and other reports accordingly. The Project requires construction of new access roads to the turbine sites and a new 44 kV overhead or below ground electrical connection line which will connect with an existing distribution line located along Taylor Kidd Boulevard.

The Project is subject to Ontario Regulation 359/09 under the Environmental Protection Act, and requires a Renewable Energy Approval (REA), as a Class 4 wind facility. The project was awarded a Feed-in Tariff (FIT) contract to operate for 20 years. The lifecycle of the project involves three stages: construction, operation and decommissioning.

Figure 1 provides a map showing the project location and Figure 2 outlines project areas within 300m from the project boundaries, as it relates to construction activities according to the REA requirements.

Figure 1: Site Plan

The REA Report Summaries are required to provide to Aboriginal Communities as a part of the Aboriginal Consultation process according to Ontario Regulation 359/09 under the Environmental Protection Act. The following report summaries include excerpts from the following documents:

1. Draft Construction Plan Report
2. Draft Design and Operations Report
3. Draft Decommissioning Report
4. Draft Noise Impact Assessment
5. Draft Turbine Specifications Report
6. Draft Transportation Plan Report
7. Draft Visual Impact Study
8. Draft Cultural Heritage Assessment
9. Draft Archaeological Assessment
10. Draft Natural Heritage Assessment
11. Draft Water Bodies Assessment

2.0 Draft Construction Plan Report Summary

The Construction Plan Report outlines the construction and installation activities that are planned to take place in order to commission the Project. The report covers the location and timing of any construction or installation activities for the duration of the construction and installation. The report also discusses any negative environmental effects and mitigation measures in respect of these effects that may result from construction and installation activities.

Construction activities are anticipated to take place over a 29-week period. Construction of the Project involves:

- Site preparation [land clearing, sediment control, grading];
- Infrastructure installation [roads, electrical lines, crane pads, transformers and substation];
- Turbine Installation [foundation construction, turbine delivery, assembly and mounting];
- Electrical connections and grid connection.

The Project requires the installation of five 2MW wind turbine generators. Step up transformers located in the nacelle of each turbine will be connected by above ground and underground collector lines. The underground collector lines will travel along access roads to a new substation located north of Taylor Kidd Road. The substation will facilitate the electrical connection of the Project to the Hydro One Networks Inc. (HONI) distribution system, as show in Figure 1. The Project will require construction of ancillary components such as access roads, crane pads, laydown areas and crane assembly areas.

Temporary (less than 90 days) onsite storage will be required for project components, building materials and excess fill. Turbine components will be delivered to the laydown areas as they are erected. Construction materials and stripped substrate will be stored within the project area at designated locations.

3.0 Draft Design and Operations Report Summary

The Design and Operations Report is an account of:

- maps and diagrams of all proposed project infrastructure;
- a list of any noise receptors that may be negatively affected by the use or operation of the facility;
- environmental effects monitoring plan;
- a response plan setting out a description of the actions to be taken while engaging in the project to inform stakeholders.

The report also lists the wind turbine specifications as they relate to other infrastructure on site, such as the Electrical Collector System and the Substation, as well as delineates these features on detailed maps and illustrations. A Facility Operational Plan, which outlines the procedures for operational monitoring and maintenance, will be supplemented by specific operations required by the manufacturer. This Plan consists of Daily Operations and Monitoring Activities, Scheduled Maintenance, Unscheduled Maintenance, Site Supervision & Employee Training, and Waste Management.

The Plan outlines the actions to be taken during the operation of the Project to facilitate communication, and means by which correspondence received will be recorded and addressed in emergency and non-emergency situations.

4.0 Draft Decommissioning Plan Report Summary

The Decommissioning Report outlines the process by which the operational Project is planned to be closed, disassembled and the site returned to pre-development conditions. The Decommissioning Plan report has been prepared in accordance to these requirements and Chapter 7 of the Technical Guide to Renewable Energy Approvals (MOE, 2011). In accordance with the guidance document, the report contains the following information:

- Procedures for decommissioning during construction (abandonment of the project);
- Procedures for dismantling or demolishing the facility;
- Activities related to restoration of any land and water negatively affected by the facility; and
- Procedures for managing excess materials and waste.

The project could, at the end of its 20-year contract, apply for permission to continue generating power using the existing facility. Otherwise, the project will be decommissioned and the lands would be returned to pre-existing uses.

The process of decommissioning is easily broken into two sections: above-ground and underground activities. For above ground decommissioning, the process begins by the wind turbines and substation being disconnected from the electrical grid and dismantled in reverse order to the procedures used for the assembly. Next, overhead lines and poles that have not become the property of Hydro One, or

utilized by another utility will be removed and post holes will be filled in. Soil at the disturbed areas will be restored to the original conditions and re-seeded using native species determined in consultation with landowners, Cataraqui Conservation Authority and the MNR.

Underground decommissioning activities include the breaking up and removal of the concrete foundations from the wind turbines and substations to a depth that is at least 1m and underground wires that are less than 1m below grade will also be removed. Culverts and road crossings will be evaluated for overall benefit to the wildlife habitat and may be retired in place if the removal would cause unnecessary harm to the area. The Decommissioning Plan also discusses the management and handling of all waste and by-products and specifies how each will be handled in accordance with regional, provincial and federal standards.

5.0 Draft Noise Impact Assessment Summary

The Noise Impact Assessment (NIA) is conducted to assess the projected noise created by the project components from the closest noise receptors, such as homes, schools and places of worship. The NIA calculated the distance from each of the wind turbines that the sound level equals the accepted noise for a receptor, as defined by the Ministry of the Environment as 40 decibels. The study found that no candidate receptors were located within the 40dB region, and the individual calculations for each home in the area confirmed these findings.

6.0 Draft Turbine Specifications Report Summary

The Wind Turbine Specifications Report is a technical document that identifies and lists the features of the turbines selected for the Project, which includes:

- the make, model, name plate capacity, hub height above grade and rotational speeds;
- the acoustic emissions data for the turbine.

The proponent has not selected the final turbine model but has conducted noise modeling using the worst case scenario. The proponent is still continuing to negotiate with various turbine suppliers. At time of the REA application submission, the proponent expects to have a finalized turbine model and will revise the noise modeling and other reports accordingly. The current draft of the report lists the specifications for the Vestas V-100 and the Enercon E-92 turbines.

7.0 Draft Transportation Plan Report Summary

This plan outlines the transportation requirements and presents a preliminary analysis of transportation routes. It is anticipated and described in the plan that turbine components will be transported along Highway 401 (Hwy 401) and through Loyalist Township to the site. The direction from which components will be transported from on Hwy 401 has yet to be determined. Two alternate exits from Hwy 401 are discussed with their respective routes to the site.

The report examined route safety, road construction, bridges, overhead utilities, intersection geometries, community disruption, seasonal weather, and traffic volumes. The Roads & Bridges division for the County of Lennox & Addington was consulted regarding local road restrictions and permitting requirements.

8.0 Draft Visual Impact Study Summary

The Visual Impact Study (VIS) shows the wind farm's appearance after construction, from various familiar vantage points in the area. The VIS was created digitally using Computer Aided Design software to model the turbines and render them in realistic lighting and vantage point conditions. These renderings are digitally combined with panoramic photographs from around the Loyalist Township to give a realistic view of the Project when completed. The VIS was conducted using eight vantage points.

9.0 Draft Cultural Heritage Report Summary

A Cultural Heritage Assessment is composed of two parts: a Heritage Assessment which looks at built structures and other features of cultural or heritage significance such as heritage buildings and an Archaeological Assessment which looks for features of archaeological significance within the study area. These two components are discussed further in this section and Section 10.

AMICK Consultants Limited undertook a Cultural Heritage Evaluation and Stage 1 Archaeological Background Research study of lands potentially affected by the proposed undertaking and was granted permission to carry out archaeological fieldwork on 1 September 2010. The study area was subject to reconnaissance and photographic documentation on 17 September 2010.

Cultural heritage resources comprise built heritage resources and cultural heritage landscapes. No built heritage resources or cultural heritage landscapes were identified within the study area. A Heritage Impact Assessment (HIA) is not recommended.

10.0 Draft Archaeological Assessment Summary

AMICK Consultants Limited undertook a Stage 1 archaeological assessment of the subject property, including a property inspection, the property was identified as holding archaeological potential. The report recommends that the proposed undertaking be preceded by a Stage 2 archaeological assessment.

Following the above recommendation AMICK undertook Stage 2 physical assessments of the property in areas where the ground may be disturbed during project construction and operation. Based on the physical assessments of the property, no archaeological resources were encountered. It was recommended that no further archaeological assessment of the property is required.

Before construction, Ernestown will be developing a communications plan which outlines the process for informing all affected and interested Aboriginal communities, should any archaeology findings be encountered during construction.

11.0 Draft Natural Heritage Assessment Summary

The Natural Heritage Assessment (NHA) is a detailed investigation undertaken to understand the natural features of the project location (and surrounding ecosystems) and the impacts of the proposed development on these areas, while proposing mitigation for any negative impacts identified. The Ministry of Natural Resources (MNR) has established guidelines that the Proponent has followed in the Assessment; which has been thoroughly reviewed by the MNR.

The Records Review investigated the current records held by regional, provincial and federal agencies, pertaining to the topography, natural features and water courses in the region. The findings of the NHA Site Investigation revealed that various areas of wetland, woodland, alvar and valleyland exist in the project location. The Evaluation of Significance found that several areas of woodland, valleyland, wetland and alvar are provincially significant. Measures to protect these areas and mitigate negative impacts are proposed in the Environmental Impact Study. The results of the NHA indicate that there are some significant natural features on the project site, but that the Project poses few impacts to these features. In addition, the Proponent will undertake reasonable care in executing the mitigation measures to minimize the impacts to vegetation and wildlife, for example:

- Project construction activities can be scheduled to avoid sensitive breeding seasons;
- Erosion and sedimentation can be mitigated by sediment control fencing;
- Staging areas will be properly located to minimize disturbance to woodland and wildlife habitat.

12.0 Draft Water Bodies Report Summary

The objective of the Water Body Report is to investigate and report on the understanding of the water features in the project location and the in the regional water system. The investigation includes a records review and a site investigation, followed by an impact assessment and mitigation proposal.

The findings of the Report were that the water bodies that flow through the project location are part of the Parrot's Bay Conservation Area. The watershed, in our project location, includes intermittent streams and permanent streams that support wetland areas in a small area of valleyland. The impact assessment found that the water crossings proposed pose little impact on the water bodies and that overall impact to the flora and fauna is minimal.

July 17th, 2012

Dear Chief and Council,

Reference: Ernestown Wind Park Documents for Your Review

This letter is an update pertaining to the Ernestown Wind Park, planned in Loyalist Township, proposed by Ernestown Windpark Inc., as general partner of Ernestown Windpark LP. This project is undergoing Ontario Regulation 359/09 also known as the Renewable Energy Approval (REA) process. As such, detailed reports evaluating the potential impacts of this project are now available to you in this package. In addition, a meeting for the public is expected to be held in Summer 2012 to share the results of environmental studies conducted for the project. A notice of the date and time of this public meeting will be sent to you well in advance.

To facilitate your understanding of the project, we are including the following draft assessment reports in this package:

Draft Project Description Report
Draft Construction Plan Report
Draft Decommissioning Plan Report
Draft Design and Operations Report
Draft Noise Impact Assessment Report
Draft Turbine Specifications Report
Notice of a Proposal and Public Meeting

Draft Transportation Plan Report
Draft Visual Impact Study
Draft Cultural Heritage Assessment
Draft Archaeological Heritage Assessment
Draft Natural Heritage Assessment
Draft Water Body Report
Notice of a Public Meeting

Based on the assessments performed to date, no adverse impacts to aboriginal or treaty rights are anticipated from the proposed Ernestown Wind Park. If, having reviewed these documents, you have any information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty rights - and any measures for mitigating those impacts - we respectfully request that you provide this to us in writing. We also respectfully ask that you provide in writing any information that, in your opinion, should be considered in preparing any of the reports described above.

We invite you to make this information available to your members. You will have 60 days in which to review these documents prior to the public meeting. Ernestown would also like to hold a *special* consultation meeting for the community to provide an opportunity for any interested members to learn about the project, ask questions, and raise concerns. We wish to engage in meaningful consultation with you in an open and transparent process, consistent with the community's consultation protocol, customs, and practices.

Ernestown Windpark Inc. as general partner of Ernestown Windpark LP

2300 Yonge Street Suite 801, PO Box 2300, Toronto, Ontario, Canada M4P 1E4
phone: (416) 864-9977 fax: (416) 864-9568 web: www.ernestownwind.com

We appreciate your involvement in this process and look forward to discussing the Ernestown Wind Park with you further. As always, if you have any questions or comments, please do not hesitate to contact us through myself, or John Kim Bell.

Respectfully,

Nhung Nguyen
VP Development
